

The images and videos are high quality and will leave you awestruck. There are over 9000 videos that immerse you completely and keep you watching for hours.

Third Rock Radio is one of the features. It is an alternative rock radio station and you can stream it from the NASA app.

There is live streaming of NASA TV. You can check the satellite trackers for which ones are orbiting the earth and if any sightings are possible.

It gives you maps, information and links to the NASA Centers and you can even schedule a visit to a NASA centre on the app.

The NASA app has something for everyone – from kids to students to NASA obsessed space geeks. It is very informative and graphics that captivate you in from the very start.

Other E-learning apps

There are a bunch of e-learning apps on topics you might not know are out there. Each of these apps have something to offer and are worth downloading and using at least once. There are a few of them-

Brilliant

Brilliant is an app developed after the website Brilliant.org which is an intellectual community where one can discuss and solve problems related to mathematics, logic and science. The problems are present by people all over the world, of different intellectual levels. Some are even national Olympiad champions. Through this app you are
