

DIY: MAKE YOUR OWN E-LEARNING COURSEWARE

It's time to give back to the community and impart some knowledge

Educational technology, as we have seen in the chapters before this, has brought about a paradigm shift in the way educational content is being communicated. The previous chapters have also showcased a ton of options that e-learning provides for eager learners. But what if you needed to know how to make an e-learning course of your own instead of joining one? That's exactly what this chapter is for. We'll show you the entire process of how an e-learning course is made, along with the different software/platforms that are used to make them.

However, before we get started let's try and clarify what the buzz word 'educational technology' tries to convey. When the word technology is said, the layman usually thinks of electronic gadgets such as computers, mobile phones, dvd players etc. and you cannot blame him/her for that is what the word is popularly used for. However, the word technology originally means 'the application of scientific knowledge for practical purposes'. This definition clearly tells us that electronic gadgets do not necessarily
