- ▶ **Blackboard CourseSites:** Blackboard thanks to 'Blackboard Learn' is one of the more popular LMS companies out there, and has a free version of it called 'CourseSites'. CourseSites is aimed at individual instructors and caters more to the academic market than the corporate market. It's a great free option with the ability to log in using popular services such as Facebook and Gmail. It is extremely user friendly. However, it lacks some of the functionality that the paid version offers, and since it caters to individual instructors, there are limitations imposed.

- ▶ **Latitude Learning:** Latitude Learning is a "Freemium" option that is free to use for up to 100 learners and becomes paid (starts from \$1000). It is a great option for individual teachers teaching really small classes. It includes certification and also integration with Webex for video meetings. Latitude learning, unlike the other solutions on this list, also can be used for corporate training effectively.

- ▶ **Schoology:** This is another "Freemium" option with a lot of great features for both individual teachers and for enterprises. It comes with many interesting and visually impressive features. It's a web based package and includes mobile access, Google Drive integration. However, there are slight drawbacks such as that of the discussions feature not allowing moderating by the instructor.
