

on emphasised features can surprise you once you start experimenting and exploring the interface. With easy audio importing from Google Drive and Soundcloud storage the task becomes far more easier. The interface allows for users to directly record audio to the website using their mics with a limit of 20 minutes, in total you can upload and edit up to 10 hours of audio. The editing interface exists in a pop up window with the classic layout which not only shows the entire clip timeline but also utilises a part of the screen to show the zoomed in waveform of the selection. The top banner has all the basic tools for playback control and editing tools. Clips can quickly be made using trim and faders. With scores of audio special effects options and other options for adding audio markers, looping and audio analyses the functionality of the application is fairly high.

FileLab Audio Editor

Find it at: <https://audioeditor.filelab.com/app>

The FileLab Audio Editor is a part of the FileLab editing tools and requires a FileLab plugin to be installed on first use. With a similarly easy to use interface and wide compatibility with different file formats, the application is very appealing to new and experienced users alike. The editing is limited to one file at a time which makes combining different audio clips difficult. Its greatest utility is as an add-on to the Video Editor to enhance the audio editing for your video clips but beyond that its one track editing makes it very limiting.

Image

Image editing online has been the most prevalent activity within multimedia that has captured the imagination of casual users. From cartooning photographs to experimenting with HDR photography, there is possibly no limit to what a web based application can do. However, with respect to high end photo editing which is at par with Photoshop there are limited options. And the usual ones are nearly incomprehensible to newcomers who don't have a ready familiarity with the process of photo editing. We filter down the many online options to a select few so you can edit any photo to look its best.

Pixlr Editor
