

# EDITING - DO'S AND DON'TS

Before you start wielding your new found powers, let's lay down some ground rules.

**Y**ou've learnt virtually everything there is to learn when it comes to working with editing programs across platforms. As responsible tutors, we need to conduct a few sessions on ethics.

### Video

The first rule of video editing begins when you shoot. Don't ever for a moment think 'we can fix that in post'.

### Do's

**Use Audio Filters.**

While this practice may seem like it's been put here by mistake, be assured that it's in the right place. One key point that a lot of people who develop content for YouTube forget is that having a video that looks good alone isn't going to cut it. Make sure you mix the voices down, apply a noise filter and please for the love of god, use a clap and sync your sound.

**Colour correct**

The third most important rule while editing video is colour correction.
