

then go ahead. Just don't photoshop a pair of wings on your little girl because she's your angel.

Make her barbie

While fixing a few spots and getting rid of a few zits is fine, don't smoothen skin to the point that it looks like plastic. Also, don't add a fake glow or make people fairer. That's just wrong on several levels.

Go crazy on the effects

If you love lens flare, get a lens that does. Don't add lens flare. Especially when there's not light hitting the camera. The same goes with juicy bokeh.

No Lord No!

Make it look obvious

If you're going to ignore our advice and still do as you please, the least you can do is do a good job and not make the edits look obvious.

Audio

The wonderful world of sound is best experienced when no corners are cut and all you hear is real and natural.

Do's

Catch it right

When you're recording try to do it right. Make sure your mic is centered and take a few extra takes just in case.

Shhhhhh

Whatever you record, whether it's a song or a voice over or anything else, make sure you do it in absolute silence. This means no ACs, not talking and definitely no cell phones. The rule on no cellphones needs to be emphasised because of the interference mics pick up when you're either about to get a call or you have a message coming in.

Sound droof

As you climb up the ladder when it comes to recording sound, your equipment is going to go get really sensitive and you begin to understand how
