

Hardware

Display the used and free memory on computer:

- # free

Display information about the CPU model:

- # cat /proc/cpuinfo

Display information about the hardware memory:

- # cat /proc/meminfo

User

Display the active user ID with login and group:

- # id

Display last login on the system:

- # last

Display who is logged onto the system:

- # who

File Command

Create a new directory:

- # mkdir DirectoryName

Create multiple directories:

- # mkdir -p DirectoryName1 DirectoryName2 DirectoryName3

Create or update a file:

- # touch File

Display all information about files/directory:

- # ls -al

```
total 8
drwxr-xr-x  2 root  root    100 Sep 16 13:26 .
drwxr-xr-x  4 root  root     90 Sep 16 13:26 ..
-rw-r--r--  1 root  root     90 Sep 16 13:33 .ash_history
lrwxrwxrwx  1 root  root      9 Sep 16 13:26 dos -> /root/dos
-rw-r--r--  1 root  root    242 Sep 16 13:26 hello.c
```

'ls -al' command displays all file and directory information

Display content of file:

- # more File

Display first 10 lines of file:

- # head File

Display last 10 lines of file:

- # tail File
