Fun with Cardboard

You must have created fun little crafts using cardboard in your art and craft classes in school. Well, it's time to take things to the next level with these geeky cardboard DIYs.

SCIENCE - PAGE 65-74

68 | Climate engineering

It could be our last and most effective hope to undo the effects of global warming.

70 | Single cell DNA sequencing

Single cell sequencing can revolutionise the field of medical science and research.

72 | Clearing up space junk

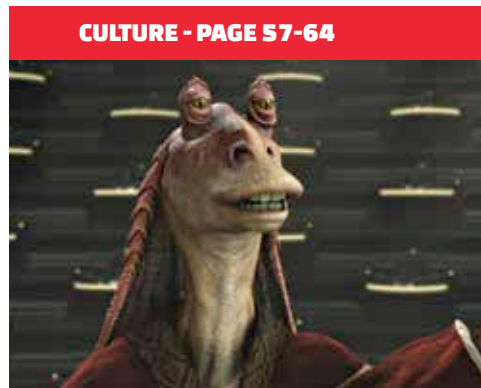

With abandoned satellites still in orbit and newer ones being launched to replace them, space junk is increasing.

74 | Bacteriophages

Bacteria are evolving resistances faster than the rate at which we can develop new antibiotics.

AND MORE

CULTURE - PAGE 57-64

58 | Crazy fan theories

There are fan theories, and then there are *these* fan theories!

60 | Pseudoscience

If it's pseudo, then it's not science, and we definitely don't have time for it.

61 | Crypto-shympto!

Boo-Man lets you know exactly what he thinks about all this cryptocurrency nonsense.

63 | 1000 Words

A closer look at the microanimals that surround us, and their superpowers.
