

Wakanda accent explained

Black Panther's dialect coach explains why various character's accents seemed to be so different from one another. <http://dgit.in/WakAcc>

Snapchat stock tumble

Snap saw its stock price drop from \$19.02 per share to \$17.14 over the last 24 hours due to a single tweet from Kylie Jenner. <http://dgit.in/Snptmble>

Corsair H115i PRO RGB CPU liquid cooler

Cooler and quieter

Price
₹9,799

C

orsair's CES 2017 launch portfolio saw the H115i PRO RGB which

brings about a few improvement over their H110 and the H110i. Something that stands out immediately is the CPU block which has a lower profile than the previous coolers from Corsair's stables. The H115i's radiator has support for 140mm which is complemented by Corsair's ML140 fans. There are RGB elements on the fans as well as on the CPU block. The cooler comes with all the popular mounting plates for both Intel and AMD. And the contact surface has a copper plate with a brushed texture. For the pivots, the H115i uses plastic joints. We prefer metal on the elements that tend to get really hot since plastic does tend to crack. However, we've been using Corsair's liquid coolers since the H40 and they're still powering through.

Installing the cooler was a breeze and during peak load at stock frequencies, the 7960X hit 58 degrees celsius. Upon overclocking, the temperature rose to 71 degrees celsius which isn't that far off from the good air-coolers we've tested. The RGB switching is pretty smooth as well, in case that's something you're interested in knowing. Acoustically, the cooler is quiet as well. Overall, the Corsair H115i PRO RGB is a pretty great cooler if you want to go for a liquid cooler.

—Mithun Mohandas

SPECIFICATIONS

RADIATOR: 280mm | FAN MAX. RPM: 2000 | PEAK SOUND LEVEL: 37 dBA | PEAK AIRFLOW: 97 CFM | MATERIAL: Copper base plate | WARRANTY: 5 years.

ASUS ROG GL503VM Hero Edition

The better half of the GL5053VM

Price
₹1,49,990

A

sus GL503VM Hero Edition is built entirely out of polycarbonate.

Weighing around 2.5kgs and with 2.3cm of thickness, this machine is easy to carry around. The entire machine gets a smooth matte finish that isn't smudge-free but does a good job of not making it look very evident. The laptop has retained its Aztec design language but has refreshed the approach, making it stand apart from the previous line of ROG laptops. The top and bottom curve a little, making it stand out from the conventional rectangular laptops. The Asus GL503 Hero is fairly loaded in the I/O department too. The Asus ROG GL503VM Hero comes with an Intel Core i7 7700HQ processor clocked at 2.8GHz, paired with 16GB of DDR4 memory clocked at 2400MHz (upgradable up to 32GB). For graphics, it is loaded with an Nvidia GeForce GTX 1060 with 6GB of GDDR5 video memory. This makes the machine VR ready. Is Asus ROG Strix GL503VM Hero worth going for? Yes, for a price tag of Rs 1,04,990, you're getting a really solid package. The laptop is built really well, the hardware possesses enough firepower to rock power hungry games with ease and its lightweight construction makes it perfect for mobile gamers. Sure, the loud acoustics make it slightly annoying and the lack of any metal in the body does make it feel kind of like a budget machine, still, it's a great option to go for at this price point.
