

# TOOLBOX (₹4)

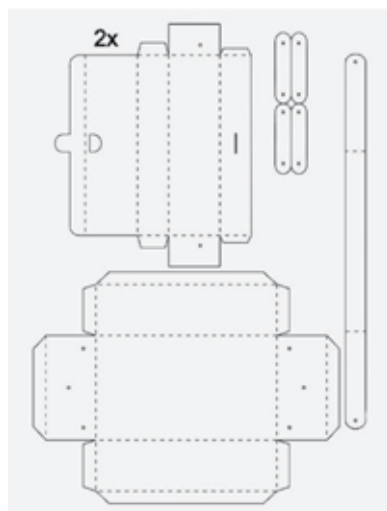

A handy toolbox that can be scaled up depending on what you intend to keep in it. This toolbox, even with two additional compartments, folds up into a compact structure. You can make modifications to the latch structure to increase stability.

## MATERIALS NEEDED

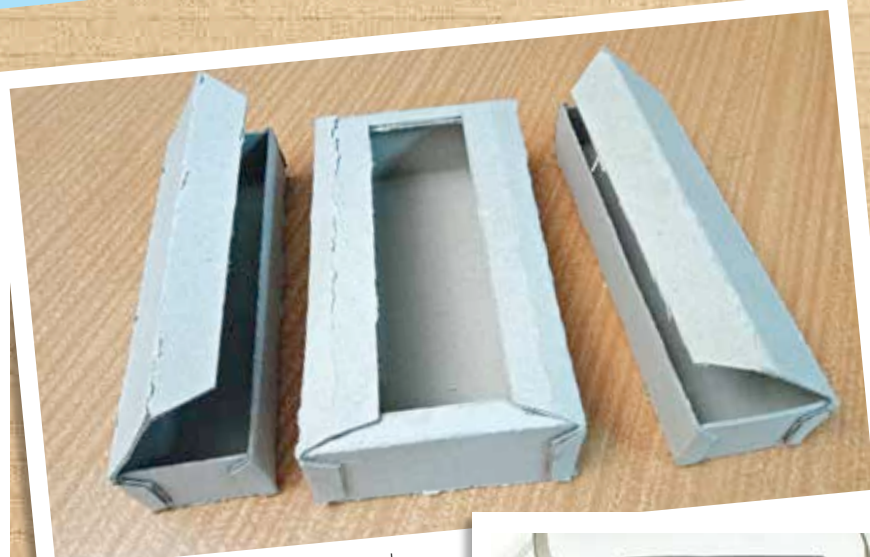

- Cardboard: Free
- Screws: ₹4 for 12

**STEP 01** Draw the cutouts as shown in the image above

**STEP 02** Cut the pieces out

**STEP 03** Fold along the dotted lines and paste the flaps over the sides of the boxes to end up with the base box and the two compartments

**STEP 04** Put the screws into the ends of the smaller and the large strips that were cut out earlier.

**STEP 05** Make holes on the sides of the boxes and insert the strips as shown in the image. The toolbox is functional right now but still needs some final touches.

**STEP 06** Add sponge to the insides of the box to avoid cutting your fingers on the sharp ends of the screws

**STEP 07** Your toolbox is ready
