

TOOLS YOU NEED

This is a list of tools we used for the DIYs showcased in the magazine. They can be used on many other DIYs, and are good to have around to encourage you to take up more projects. There are power tools, sharp edges and things that get hot on the list, so please keep safety in mind. Now get cracking on planning your DIYs to us. Given that we also had a whole magazine to make and only a few days for these DIYs, we're sure you can do far better. Get cutting!

PEN KNIFE

International DIY sites will list an X-Acto knife as a required tool of choice for making small, precise cuts. It is a brand name, and the tool is actually known as a pen knife.

Where to buy: Arts supply or stationery shop

GLUE GUN

A glue gun uses an adhesive stick that is melted by a nozzle while applying. It is useful for sticking all sorts of different material together, including plastic, cloth and cardboard.

Where to buy: Arts supply or stationery shop

DREMEL

A Dremel allows you to rotate a bit at varying speeds. Depending on the kind of bit used, the tool can be used for drilling, sanding or cutting holes.

Where to buy: Amazon.in, sold by Dremel

SOLDERING IRON

A soldering iron is essential for creating circuits. The instrument is used to apply small amounts of molten solder, to permanently bind the electronic components.

Where to buy: Hardware or electronics store

ROTARY CIRCLE CUTTER

This tool makes cutting circles from various kinds of materials much easier. The half length scale lets you know the diameter of the circle. Be sure to get one with spare blades.

Where to buy: Arts supply or stationery shop

TRACING WHEEL

A tracing wheel can be used to quickly transfer the necessary cuts from a paper template, to a corrugated cardboard sheet below it. For working with cardboard, choose one with a serrated edge.
