The Craziest fan theories

There are fan theories, and then there are *these* fan theories

Arnab Mukherjee | arnab@digit.in

A

ll of us have our favourite fandoms, don't we? Well, some might have a half-hearted respect for

everything that is part of the official mythos. That doesn't stop some fans with an (over)active imagination from coming up with their own theories to explain and expand their favourite universe or story. More often than not, these theories make a whole lot of assumptions and are downright hilarious. But sometimes, the sheer craziness combined with proper analysis and backed by actual observations lead to some insane fan theories.

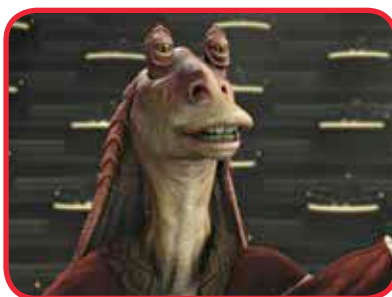

DARTH BINKS

Starting this off with something that is hilarious and has a detailed analysis to back it up at the same time, the most infamous character from the Star Wars prequel trilogy is theorised to be a great Sith lord based on a number of clues, detailed by reddit user Lumpawarrior in this thread: <http://dgit.in/JJB5ith>.

The analysis basically highlights the numerous times when Jar Jar's seemingly innocuous and seemingly 'stupid' actions have actually had important consequences and would have required considerable amount of combat mastery to pull off. The best part of this section is where is stumbling,

uncoordinated actions are compared, move by move, with a particular discipline of Kung Fu called Zui Quan, or Drunken Fist wushu.

To establish his force powers, the theory highlights how a silly character like him goes on to become a Bombad General and eventually a senator - apparently by the use of force based mind control. The best part of this theory is the analysis of his actions being based on an overarching evil motive to

Behold the Phantom Menace

drive the plot where it went. He taught Anakin to be disrespectful of Qui-Gon by making fun of him behind his back, fanned the flames of Anakin's feelings for Amidala. This was because he was a co-conspirator with Palpatine, possibly even his master. It does seem like a rare coincidence that both Binks and Palpatine are from the planet of Naboo.

In light of the overall structure of the Star Wars universe, many have supported this theory by stating that

Jar Jar was originally planned to be the phantom bit of the Phantom Menace. Another aspect of the universe that is put behind this theory is George Lucas' particular mirroring of the original trilogy in terms of narrative themes. While the light side in the original trilogy has Master Yoda, the dark side in the prequels has - you guessed it - Darth Binks.

DUMBLEDORE = DEATH

To understand this theory, we might need to head to one of the popular fables in the universe, namely, the tale of three brother. In the story, the three brothers come across Death while crossing a river they were supposed to die in, with a magical bridge. Death cunningly grants them the ability to ask for "gifts" that they might need to hide from him. The brothers ask for the Elder Wand, the Resurrection Stone respectively, and the invisibility cloak.

Dumbledore had all three items at some point of time. And we all know by now how he gave the invisibility cloak and the resurrection stone to Harry, and inadvertently ended up giving the Elder Wand to him too. It is also evident that Dumbledore was responsible for the death of Voldemort (the brother after the Elder Wand) and Snape (the brother whose loved one dies) and it was Harry who lives till a
