>> Feedback for the March 2018 issue of Digit

Send your feedback at editor@digit.in

Thank you for the wonderful article on blockchain in the February edition 2018 of Digit-Fast-Track. I had zero knowledge about blockchain, but now I've got a crystal clarity on the working and application of blockchain. Thanks again

That's what we live to do, and we're so happy we could do that for you! Thank you for taking the time to write in and share that with us, we really appreciate it!

—Robert

Are there any plans for the next CTC? ETA?

—Rahul Agarwal

Yes, hoping to have one in June 2018.

—Robert

Hi Team Digit, I am a huge Digit fan and have actively enjoyed reading the magazine from 2005 to 2009. I can definitely say that Digit changed the way I looked at

technology as a middle school kid. I still fondly remember reading articles and reviews by Robert, Nimish, Deepak and would wait for the next month's issue excitedly.

As a 12-year old kid, I had made a game called 'SPY', which was featured in the August 2006 issue of Digit Magazine. My game was included in the CD which came with the magazine, and that was a huge motivation for me. I knew I wanted to grow up and be associated with the gaming industry after that.

Fast forward a decade, I am currently pursuing my master's degree at Duke University and am closer to my dreams of making an impact in Silicon Valley. I am currently interviewing with a leading game development studio and am working towards the next generation of gaming!

I wanted to play the game I made as a kid again. Unfortunately, we did not have cloud backup back in 2006, and I have lost the game. Can you please email me the game (SPY) from the August 2006 issue?

Hope you keep the tech magic alive and keep inspiring many more people!

Looking forward to hearing back from you soon.

Glad to hear you're doing well and aiming for the stars. I seriously doubt we have a copy of that lying about, but we will start digging for it and let you know if we find one. Fingers crossed!

PS: Apparently we were able to find it. Enjoy!

—Robert

Hey Robert, I am writing after some time. I want to talk over a few things I am dissatisfied with.

Firstly and most importantly, I feel dmystify is losing its charm. I am not saying that the writing is not good, it's interesting and nice to read. But, the quality of the content has deteriorated, and also, the number of mistakes in it (not just typos, I mean factual mistakes, though not major) have gone up.

What I feel is that you should take more time to draft it. I have an idea. Why not make it bi-monthly? In the remaining alternate months, you could give out one more DVD, which many readers have asked for, because I feel sometimes, the DVDs get filled with so much generic content, that you can not put in more month-specific content. So consider this please. It's a win-win for everyone.

Secondly, I do not like how you treat the Cult section. When it was introduced in the new format, I rejoiced, as Digit actually drifted closer to a geek-centric magazine. I understand that Tech is the most important section, sure, but shouldn't Cult at least get the second place? For instance, in the March issue, it was even shorter than the Sci section! So please try to cover more things on movies, Sci-Fi etc. I liked the fan-theories article this month and that's what Cult should be like. More of that or similar topics, would be great.

Also, what's the criteria for something to come in Alt? I get that Alt is basically **dgt** content, but at
