Teardown: Samsung Galaxy S9+

An incremental update to a great Android smartphone

Abhijit Dey | abhijit@digit.in

Earpiece as a loudspeaker

Earlier there was only one loudspeaker on the phone, Samsung has now doubled the earpiece as a loudspeaker as well. It's common on a few other phones and now, the Galaxy S9 and S9+ will join the ranks of smartphones with stereo speakers.

Slow motion capture

On the S9 and S9+, you will be able to capture slow motion videos at 960 fps with a resolution of 720p. To accommodate the multiplied stream of sensory data in slo-mo videos, Samsung claims that the integrated DRAM with the dual-camera module will be able to handle all of it.
