

Uber sells to Toyota

Uber is reportedly selling its self-driving technology, in development for a while now, to third party companies as well. <http://dgit.in/UbrSelf>

New Shinkansen

Japan unveils a 'supreme' version of its bullet train that comes with premium features, but runs as fast as previous models. <http://dgit.in/ShinSup>

Same battery specs

Samsung decided to go with the same specifications as seen on the Galaxy S8+ and Note7. So, the S9+ gets a 3.85V and 3,500 mAh battery.

Samsung Galaxy S9+

Mechanical camera aperture

The primary camera in the dual-camera module has a mechanical aperture. It will auto-adjust according to the lighting conditions. For low light, it can drop to f/1.5 whereas for normal photos it can go up to f/2.4 aperture.

Blood pressure sensor update

The heart rate sensor was present on the previous S8 line-up. Now, the sensor will also be able to monitor your blood pressure with the "My BP Lab" app. Samsung has partnered with the University of California, San Francisco (UCSF) to enable this feature.
