

### Samsung reveals Exynos 7

The Exynos 7-series 9610 processor brings Improved image processing capabilities for mid-tier smartphones. <https://digit.in/Exynos7>

### Unreal Engine steps up

Unreal Engine's demo at GDC 2018 was a 'synthetic human' that was rendered in Epic's Unreal Engine in real time, revealing cutting edge 3D graphics. <http://digit.in/unrealengineGDC>

# HyperX Alloy FPS Pro

Only for the niche portable gamer

Price  
₹1,499

T

he HyperX Alloy FPS Pro is targeted at a niche audience who need a

portable mechanical keyboard.

The absence of the numpad can

straight away put off certain

people. However, if most of

your usage doesn't require a

numpad, and it's mostly

gaming, then you might prefer

a smaller keyboard. The form factor is smaller compared

to other mechanical keyboards, so it will take less space

on your desk. The detachable cable is a luxurious feature

required for portability. This exerts less strain on the

cable when it's being carried around. But they haven't

included a carry pouch as seen on the Alloy FPS.

We didn't notice any compromise in build quality.

The chassis has a metal frame on top that houses the

switches. Keycap quality is the same as what we see on

similarly priced keyboards. The keycap stem is dense

enough to not wear out easily. With the introduction of

a detachable cable, the risk of damage increases if you

regularly keep on detaching the cable.

All the above mentioned features are rare to find on

any other mechanical keyboard. If you're looking for

these specific features on a gaming keyboard then the

Pro is a solid choice to consider. However, if you don't

need a detachable cable and wouldn't mind a slightly

thicker keyboard, you should go for the Cooler Master

MasterKeys Pro S. It has more features and almost the

same build quality.

—Abhijit Dey

### SPECIFICATIONS

KEYBOARD SIZE: TKL | KEYBOARD BACKLIGHTING: Single LED (Red) | SWITCH TYPE: Mechanical (Cherry MX Red 50-million lifecycle) | POLLING RATE: 1,000 Hz (1 ms) | KEY-ROLLOVER: N-key rollover | INTERFACE: USB 2.0 | DIMENSIONS: Width - 35.8 cm, Depth - 13 cm, Height - 3.4 cm

# Samsung Galaxy S9+

The devil is in the details

Price  
₹64,900

T

he Galaxy S9+ is evidence that this is going to be an

iterative year for Samsung. As

much as it would like to call

the Galaxy S9+ a 'reimagina-

tion' of the smartphone, it's

more of a refinement with

some inevitable upgrades.

That being said, it is the best

Android smartphone

available right. It's looks

stunning especially because of

the astoundingly bright

display and a design that

blends the display to the rest

of the body. But more than that,

this time, Samsung has taken a

new approach to improving the

low-light performance of the

camera. The rear camera can

switch between two apertures.

The camera, if one knows how

to take good photos, can

produce some high-quality

shots under poor lighting, especially in a restaurant on

indoors, but there are limitations. Samsung's aggressive

noise reduction algorithms keeps the image from being

perfect, but it's a commendable effort nonetheless. You

can't go wrong with the S9+. It has everything you want

from a top-of-the-line flagship phone — Latest high-level

hardware, excellent design, high security, and an

excellent camera. Having said that, it isn't much

different from its predecessor, the Galaxy S8+, which is

now cheaper and hence, a more value-for-money

proposition. The Galaxy S9+ is evidence that this is an

iterative year for Samsung and if you have been holding

out on buying a good Android flagship, this is the one to

get right now.

—Subhrojit Mallick

### SPECIFICATIONS

SOC: Exynos 9810 | GPU: Mali-G72 | OS: Android 8.0 | CARD SLOT: microSD (up to 400 GB) | SIZE: 6.2-inch | RESOLUTION: 1440 x 2960 pixels | CAMERA PRIMARY: 12 MP Dual (f/1.5-2.4 + f/2.4) | CAMERA SECONDARY: 8 MP (f/1.7).
