After the insane commercial success, Marvel Studios president, Kevin Feige confirms another Black Panther movie <http://digit.in/blackpanther2>

Biomimetic robots take inspirations from the designs perfected by nature of millions of years of evolution.

Aditya Madanapalle | aditya@digit.in

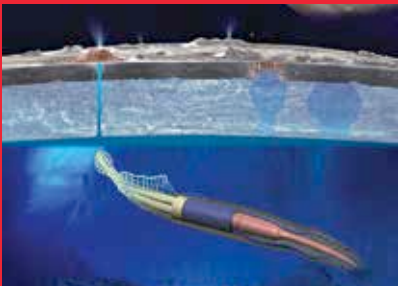

The robots by Clear Flight Solutions are used for bird control and aerial inspections.

Caltech has mechanically recreated all the key flight systems of a bat with its self contained Bat Bot. The musculoskeletal system is capable of moving in more than 40 rotational directions. The flexible wings actually amplify the motion of the actuators, considerably reducing the energy use for flight.

Amazon CEO Jeff Bezos recently took a SpotMini by Boston Dynamics for a walk.

NASA wants to use soft robotic squids to explore the sub-surface ocean on Europa.

The SoFi robot by MIT is designed to document marine life from up close.

The Robobee by Harvard University is designed for use in agriculture and disaster relief.

The MantaDroid developed by the National University of Singapore is a fast swimmer.
