The electronic musician is developing his own FPS game with a short gameplay clip already out on his Twitch. <https://digit.in/deadmau5fps>

Corsair K68 RGB

Spill-proof design, now in RGB

Price
₹7,499

T

he Corsair K68 RGB is an upgrade to the K68, Corsair's first

spill-proof mechanical keyboard. It incorporates the build quality and high-end features that make Corsair keyboards premium while giving users a peace of mind from accidental spills. The RGB lighting on the keyboard can be controlled using the Corsair Utility Engine software. You can also record macros easily using the same software. The K68 RGB doesn't include a USB passthrough port. We believe the decision was made to prevent water from entering and damaging the keyboard.

We tested the keyboard in Switch Hitter and found no switch chatter or ghosting. The keyboard supports full N-key rollover, so you don't have to worry about multiple key presses being skipped out. Using Cherry MX switches, you are assured to get a durability of over 50 million keystrokes that should last you for a decade or more. However, Corsair continues using laser etched ABS keycaps while budget mechanical keyboards are shipping double shot keycaps. Doing that will guarantee a longer lifespan for Corsair's keycaps like the switches.

Mechanical keyboards are still selling on a wide price range right from ₹15k down to ₹3k. The Corsair K68 RGB tries to maintain the company's legacy of delivering premium mechanical keyboards with a complete software experience and guarantee of build quality. Go for it if spill proofing is an absolute must.

—Abhijit Dey

SPECIFICATIONS

KEYBOARD SIZE: Standard, Numpad Included | KEYBOARD BACKLIGHTING: RGB LED | SWITCH TYPE: Mechanical (Cherry MX Red 50-million lifecycle) | POLLING RATE: 1,000 Hz (1 ms) | KEY-ROLLOVER: N-key rollover | INTERFACE: USB 2.0 | DIMENSIONS: Width - 45.5 cm, Depth - 17 cm, Height - 3.6 cm | CABLE LENGTH: 1.8

Huawei P20 Pro

A benchmark for all smartphone cameras out there.

T

he Huawei P20 Pro is a smartphone that stands out distinctly from all its

peers, whether it's in terms of its imaging prowess or the way it looks. It comes with an FHD+ (1080x2240) 6.1-inch OLED display, pegging its pixel density at roughly 408ppi. The maximum brightness tops out at 818 lux (roughly 260 nits), making this a more than an adequately bright display for using outdoors. The Huawei P20 Pro ships with three cameras and all three lenses are made by Leica and come with optical image stabilization. The highlight here is not just the number of camera units, or the Leica branding, but the 40-megapixel sensor. This is the same size sensor found in regular point and shoot cameras. It can even shoot very decent images in low light thanks to the large sensor and the autofocus works superbly in all types of lighting.

The P20 Pro is a gorgeous look smartphone as well, one with a distinctive colour treatment. Huawei has put the very best hardware into the P20 Pro which results in extremely good performance for the most part. Some aspects of gaming could have been better, but after learning that the phone is not yet running the final version of EMUI, we wouldn't be surprised if these minor problems cease to exist. The Bluetooth issue is problematic as well, but again, a software patch should be able to fix it up. Honestly, in day to day use, you're not even going to come across any glitches. Add unparalleled imaging performance to the mix and there is little reason to discount the Huawei P20 Pro as a worthy member of the elite flagship club.

—Swapnil Mathur

SPECIFICATIONS

SOC: Hisilicon Kirin 970 | GPU: Mali-G72 MP12 | OS: Android 8.1 | CARD SLOT: No | SIZE: 6.1-inch | RESOLUTION: 1080 x 2240 pixels | CAMERA PRIMARY: Triple 40 MP (f/1.8, 27mm, 1/1.7", OIS) + 20 MP B/W (f/1.6, 27mm) + 8 MP (f/2.4, 80mm) | CAMERA SECONDARY: 24 MP (f/2.0).
