

**Fox renews Lethal Weapon**

Fox has renewed Lethal Weapon for Season 3 and has cast Seann William Scott in a co-lead role.

**Yanny or Laurel?**

The internet is furiously debating if the robot is saying 'Yanny' or 'Laurel' in this auditory illusion.

>> Feedback for the May 2018 issue of Digit

Send your
feedback at
editor@digit.in

Hey Digit, it's been two months that I have been buying this magazine, although I read it at the school library for about a year. Firstly, I would like to talk about the cover story of May. Although you told us how to delete our physiographic profile, we both know it's not possible for us to cut off from this "mayajaal" as we can call it. Another problem, I am having a problem with the DVD as I am not able to download anything from it.

As for dmystify, I really appreciate the easy language here. And the FastTrack is the best handy guide for people who are digitally connected professionally. Overall, the magazine is very informative and you guys just stick to the point which I think is the best thing every magazine should do. I think this ongoing battle about posters may come to an end by alternating between a car and a gaming poster. Hoping for the best magazine this June and lot more coming from Team Digit.

—Subhrodeep Ghosh

Thank you for your feedback Subhrodeep. You should write to help@digit.in and request a replacement DVD if yours is not working. Please only make sure to

test last month's DVD to check whether the problem is with the DVD or the drive. If another DVD works, then you have got a damaged DVD, and we will send you a replacement absolutely free of cost.

—Abhijit

This is Yash Warriar, and I am a passionate musician and a Mass Media student from Jaihind College, Mumbai.

I had been working on the Super Mario Bros. Theme Music which I recreated into an Indian Classical Version which is the FIRST EVER concept of its kind. The music comprises of the three most popular theme-Overworld, Underworld and Underwater Theme followed by the catchy death sound and game over music.

We would really appreciate if The Digit could feature our work.

—Yash Warriar

Hi Yash, I loved it. I did find myself wishing that there was a more diverse arrangement of Indian Classical instruments, but I love the dedication.

Thanks for sending it in. Let me see what we can do. :-)

—Robert

Hey Digit, You guys are amazing. The magazine itself is a great info provider for geeks like me. Of course the Fast Tracks and dmystifys are legendary.

Is it only me or is it really that the humour in the magazine has decreased. I read the magazine occasionally so may have got it wrong but since I first read it, the magazine has become more formal. I would like the main magazine and other books to regain the informal tone that they once had.

About the URLs. It is really a burden to type those url in the browsers. Understand the problem you have with QR codes. I suggest that you give only one QR code at the end of the book containing all the links, ensuring the look is not compromised.

Can you provide a dmystify on black holes, Quantum mechanics and other such topics including string theory, quarks, etc. The elementary particles topic of last dmystify were not enough. A FastTrack on Raspberry pi 3 air zero will be great.

Can you provide a Linux alternative to VirtualBox. That's all. Thank you for the magazine and it's awesomeness.

—Shreshth Jaiswal

Hi Shreshth, Thanks for writing to us. You're 100% correct, and I've noticed this too. Will ask the boys to loosen up a little. :-)

Trying to find a solution, people hate going through 120+ links to find one they like. Trialling a new solution in June, tell us how you like it when you see it.

String Theory was the second dmystify we did in July 2015. Dark Matter and Dark Energy was in September 2015. Big Bang in June 2016. The Quantum World was August 2016. Black holes and Wormholes are coming in future issues.

Will take the suggestion seriously. We saw it after the magazine was sent to print. Why would you want an alternative? Just use VirtualBox itself.

—Robert
