Samsung to sell Exynos chips

Samsung is reportedly in talks with ZTE and other OEMs about supplying them with Exynos chips.

The trio camera sensors

While the lenses were fun to look at, here you can see the sensors behind them. Starting from the left, you can see the 1/2.7 inch monochrome sensor, 1/1.7 inch RGB sensor and finally, the 1/4 inch telephoto sensor. The primary RGB camera has a whopping maximum ISO of 102,400.

Huawei
P20 Pro

No headphone jack

Although it has already become a norm among high-end smartphones these days, the P20 Lite still ships with a headphone jack. Surprisingly, this is not followed on the P20 and the P20 Pro.

Yuuuge battery

Contrary to the battery capacity in the premium smartphones, the P20 Pro houses a massive 4,000 mAh monster. With an efficient software implementation, the phone should last for way longer than its competitors.

Under-used OIS

All the three cameras support hardware optical image stabilisation (OIS). However, only the 8MP telephoto camera has OIS activated by Huawei. The other cameras rely on the company's homegrown Kirin chipset's neural processing power.
