

Chrome getting horizontal tabs?

Google is testing a tab switcher for its Chrome Android app, similar to horizontal app switcher in Android P. <https://dgit.in/jun18-A38-1>

Cracks on iPhone X

The cover on the iPhone X that protects the lens on both rear cameras has started cracking on a number of units. <https://dgit.in/jun18-A38-2>

ANT Audio W59 Dual Dynamic Driver

A mediocre performer

Price
₹2,499

T

he W59 is one of the two wired IEMS from Ant Audio currently on

their official portfolio, with the other one being the more humble W55. It comes off as an attempt from Ant Audio to give you a premium experience in an affordable package. The dual drivers pack considerable power and put in an above average performance across music genres, with just a bit more to be done on making the highs sound less piercing. It provides adequate bass without losing detail. The tanglefree sheathed cables are welcome and unless you've got particularly discerning ears, the W59 provides a fairly good package in the sub-5000 range. While the unit retails at ₹2,499, we found deals that bring its price as low as ₹1200 (approx). At that price, it is an absolute steal.

Ant Audio's W59 comes off as a package that makes tall claims. From the unique design that highlights the dual drivers to its braided, encased cables, it aims for a premium feel at a budget. The audio experience also measures up and apart from a few issues with the highs, gives good competition to other names in its price bracket. The unit is available online for as low as ₹1200 - which is an absolute steal deal for this pair of IEMs. At its MRP of ₹2,499, you might want to consider alternatives such as the 1More Single Driver for ₹300 extra.

—Arbab Mukherjee

Rapoo V110

Good value for money

Price
₹3,499

T

he Rapoo V110 brings both an average mouse and keyboard to the table at a highly competitive price. We like the keyboard because even though it has a rubber dome beneath, it gives you enough tactical feedback for a satisfying typing experience. It offers lighting effects (no RGB), Windows lock, brightness levels and a small wrist rest. The keycaps are removable, making it easier to clean. It also has a spill-proof design.

We don't have a high opinion of the mouse from a gaming point of view. The maximum tracking speed is below 1 m/s which means quick flicks are out of the window. The mouse can still be used for casual FPS gaming and other genres where you don't need good sensor performance. However, for regular usage, you wouldn't notice anything and it will work out fine for you. The four DPI levels are distinguishable in usage, also indicated by the changing colours assigned to each DPI level.

In spite of the flaws, expecting high or more than average performance is unfair at this price. Among the keyboard and mouse combos that we've tested at our labs, considering performance, features, build quality and the price, the Rapoo V110 comes out with a higher overall score.

—Abhijit Dey

SPECIFICATIONS
