

a complete overhaul that changed the appearance and functionality of the app from head-to-toe. It even allows sync across devices, which is not exactly a new feature but is always a helpful one.

Vivaldi Browser

(download here: <https://dgit.in/Vivaldi>)

The Vivaldi Browser app adapts to you and your browsing patterns rather

than the other way around. It allows you seamless customisation on the browser like altering keyboard shortcuts, mouse gestures, the appearance and many more. Vivaldi also supports selecting your own theme, which makes the experience truly personal.

MAIL

Mail is an email and newsgroup client that is used in Windows 10 as the default email app. We think these alternatives might have an edge.

Thunderbird

(download here: <https://dgit.in/thunderbird>)

Mozilla Thunderbird is the perfect option for users without access to the robust and paid softwares like Microsoft Outlook. The mailing app allows you to integrate multiple mailing IDs in one place with SMTP and

POP protocols. Thunderbird is lightweight and also is an extremely responsive and easy to use mailing app.

Mailbird

(download here: <https://dgit.in/Mailbird>)

Mailbird is an email client that lets you manage all of your email IDs in one place and gives multi-tasking abilities. It is inspired by the Sparrow Email client for OS X. It has a clean, sleek appearance and blends well into the Windows 10 setup.

NOTEPAD

If you are bored of using the same old note-taking app, and want more feature rich app, try these options.

Notepad++

(download here: <https://dgit.in/notepadplusplus>)

The feature-packed text editor is a popular alternative

to Notepad. Notepad++ supports 27 different programming languages, regular expressions, syntax highlighting and folding, synchronised views and edits, making it have everything Notepad does and more as well.

Sublime Text

(download here: <https://dgit.in/sublimetext>)

A lightweight, cross-platform text and source code editor, Sublime Text is popular

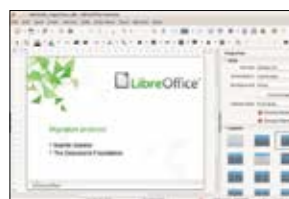

amongst new and veteran coders alike, because Python API integration comes with it. However, it can also be used as a simple note-taking and text editing tool.

MICROSOFT OFFICE

Office is one of the most commonly used office suites by PC and laptop users, including smartphones as well now.

Two capable alternatives to Microsoft Office are LibreOffice (<https://dgit.in/libreoffice>) and Apache OpenOffice (<https://dgit.in/openoffice>). Both are free

(unlike Microsoft office) and can create text documents, spreadsheets, powerpoints and more. They also save the files in Office formats.

CALCULATOR

A calculator is a calculator. What could go wrong? However, if you want a change in design or more advanced calculators if you're an aspiring mathematical wizard, you could consider other options.

Good alternatives for Calculator include SpeedCrunch (<https://dgit.in/speedcrunch>), a high precision scientific calculator and Microsoft Mathematics (<https://dgit.in/MM>), a calcula-

tor with just about every mathematical function.

REMOTE DESKTOP CONNECTION

Users can utilise Remote Desktop to connect their PCs to other systems that are far away. You can even use it with your Windows, Android or iOS device.

TeamViewer (<https://dgit.in/teamviewer>) and Anydesk (<https://dgit.in/AnyDesk>) are two great alternatives that allow you to accomplish exactly the same functions as Remote Desktop and are completely free to use (personal use only) as well.

WINDOWS ONENOTE

Windows OneNote aids free-form information accumulation and multi-user collaboration. Notes can be shared with other users on OneNote over the internet or a network.

Two applications that are popular options to OneNote are Evernote (<https://dgit.in/evernote>) and Laverna (<https://dgit.in/Laverna>). Evernote has become extremely popular and many users prefer it over OneNote and use it as their choice of app in this category.

SKYPE

If you don't want to use Skype, two popular alternatives include Discord (<https://dgit.in/Discord>) and Tox (<https://dgit.in/tox>). Both software have video chatting and voice calling functions.
