

**33% driverless cars by 2025**

Volvo predicts that a third of the cars they sell will be completely autonomous or driverless by 2025. <https://dgit.in/jul18-10-1>

**Fb.gg gaming hub**

Facebook recently launched its own game streaming hub called Fb.gg <https://dgit.in/jul18-10-2>

>> FEEDBACK FOR THE JUNE 2018 ISSUE OF DIGIT

Send your feedback at editor@digit.in

So I was reading this article today and I came across this line. I think its a grammatical mistakes for the year.

Page: 23

iPad text.

Line 4: 'April 2025'

The quantum computer still being tested because they haven't found the correct way to optimise it?

So shouldn't the article say it is being tested since 2015 instead of saying 2025?

– Amlan

The boxes are mock headlines of fictional future events. Think science-fiction...

– Robert

This is Navarun Mallick attempting to communicate with you from a distant, far-away planet. I would have loved to write a really long e-mail to you, but that must happen at a later time. What I wish to say is of extreme importance. I have, I confess, not been a subscriber of Digit for a very long time. But I certainly am a very big fan of the magazine. Whispers of the legendary Digit Crack The Code puzzles have been coming to my ears since I became a subscriber, and you can

naturally imagine how excited I was for Crack The Code 6. I am attempting the magazine leg. However, the URL that I am supposed to enter after solving the puzzle is not working. I really do not want to miss Crack The Code 6, so please help me. (CONFIDENTIAL: Between us, I'm pretty sure this month's big black-and-white box is solved to read two things- 1.This puzzle might be racist against black. You need last month's maze to solve this puzzle. 2. Born in Ulm to the same parent as scientist. Final answer of the puzzle is, naturally, Albert Einstein.) Hoping to hear from you soon.

– Navarun Mallick

Not Einstein. Born to the same parents as Einstein.

– Robert

CORRIGENDUM

In the June 2018 issue, on page 17, SanDisk iXpand Base was mentioned as a part of the product listing in India. SanDisk wishes to set the record straight and inform their readers that SanDisk iXpand Base is not available in the India market for its consumers, and apologises for any confusion caused.

This is Hariviknesh yet another avid reader of digit magazine. I have learnt a lot from your magazine especially FT and dymystify. I would like you to feature 'Building apps with react native' in the upcoming FT Issue as I am fascinated by its power and simplicity to create cross platform apps, however I could not find a simple complete online reference for it. So I would be happy to read it from you, hope other fellow readers will also be happy to build apps.

Further I have one more suggestion please provide PDF version of previous digit magazines regularly and try to provide online Link to download them

– Hariviknesh. S

We will try and cover React in a future issue, so watch out for it. We do provide the PDF versions of the digit archive. Just go to <http://dgit.in/dvdarch17umy> and follow the instructions to get access to them.

Crack The Code Feedback

I just wanted to ask if I have not completed leg 1 still stuck at one of those colour question s so let's say something magic happens !!! and I complete leg 2 so will I get anything provided I am fast?

And is the magazine leg completely different ? And yes can their be any legs for those who are students and cannot devote day and night to CTC (lack of time makes me quit doing this!!)

– Rdksuper

My brain is telling me to give up.... to live without the oneplus..... My heart is telling me to go for it.... Too bad my brain is not up for the task

– RockCHiPBox

Cracking etc clues has made me think I'm dumb
