

Google College search tool

Google has unveiled a new college searching tool that allows students to collect information about four-year colleges and universities. <https://dgit.in/jul18-31-1>

New Microsoft Office look

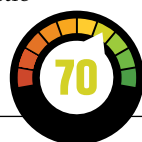

Microsoft is bringing over Fluent Design found on Windows 10 to Office apps to make them more user friendly. <https://dgit.in/jul18-31-2>

Sennheiser Momentum Free

A mixed bag of reactions

Getting a good fit from the angled earpieces of the Sennheiser Momentum Free is not entirely difficult, but isn't the most comfortable either. You get two sets of eartips included to help get the perfect fit, and its lightweight construction makes it easy to wear over long durations. However, the plastic body of the earpieces might be a bit disappointing to some. The chrome-garnished outer panel and the black-and-red colour scheme are also a bit tacky, particularly when you consider its price. The magnetic attachment of the earpieces is too weak.

As for the sound, despite the specifications sheet pointing at adequate

sound pressure level and sensitivity, the volume is surprisingly low. We could not test whether it is a unit-specific issue, but we did not encounter any other flaws, per se. The Momentum Free produces

a solid low range, delivering tight, warm bass that is fairly well balanced.

The mids are a bit low from the rest of the frequency spectrum, as a result of which you audibly feel the lack of punch in the mids. The highs are clear and well-pronounced, but could have been slightly brighter.

The overall sound is fairly well detailed, and mostly free from distortions. The only really lacking point is that the Momentum Free does not feel like it fully justifies its price in terms of the quality that it delivers. It is certainly good, but not the outright best.

—Souvik Das

SPECIFICATIONS

BLUETOOTH VERSION: 4.2 | FREQUENCY RESPONSE: 15 Hz - 22000 Hz, Maximum sound pressure level: 118 dB | TOTAL HARMONIC DISTORTION: <0.5% | TRANSDUCER: Dynamic | WEIGHT: 38 grams | IMPEDANCE: 28 ohm

ASUS VA326H 1800R Gaming Monitor

A tad old but still competitive

The VA326H has bright colours but the AHVA panel doesn't quite stand up to competition. However, in its budget, the VA326H stands tall and bright. Or should we say bright and punchy.

The Tone Response seems a teensy bit out of the ideal curve. Coming to the colour uniformity, we can see that the panel has a degrading gradient as we pan to the right. Values as high as 3.8 are rarely observed. Generally, we see these peaking at 2.6-2.8 towards the edges. That being said, these numbers are still great for any panel.

We see the panel lose out in colour accuracy and luminance uniformity and even contrast levels to a certain extent. But

FEATURES.....	68
BUILD QUALITY.....	76
PERFORMANCE.....	83
VALUE.....	75

that's what you get for non-creator oriented panels. For a gaming monitor, the VA326H is great.

The ASUS VA326H is a really competitive gaming monitor in its segment. Given that we're

looking at the Indian market, there are hardly any other 31.5-inch 144 Hz

curved monitors aside from the BenQ EX3200R. The latter has the upper hand in terms of colour accuracy and uniformity. And it's even more adjustable compared to the VA326H, however, all of that comes at a 10% price bump.

The VA326H sports a fairly even panel but loses out in some areas that aren't that critical for gaming, so at the end of the day, you have a pretty great gaming monitor in the VA326H.

—Mithun Mohandas

SPECIFICATIONS

PANEL: AHVA | SCREEN SIZE: 31.5-inches | RESOLUTION: 1920 x 1080 | REFRESH RATE: 144 Hz | CONNECTORS: DVI-DL, 1x HDMI, 1x D-Sub | AUDIO PASSTHROUGH: Yes | PROFILE CONTROLLER: Yes | CONTRAST RATIO: 3000:1 | RESPONSE TIME: 4 ms (GtG) | POWER: 28 W | WEIGHT: 7.5 kg.
