A COLLECTION OF PRO TIPS FOR EVERYTHING. Without being limited to a particular topic, these tips are from popular software, to coding, to browsers, search, storage rules, password rules, mobile device hacks, bios cracking, tweaks explained and everything tech under the sun.

Get started with the Google Tasks app

Google Tasks is one of the simplest and most user-friendly to-do apps. Once hidden in Gmail or Google Calendar, now a standalone app, Tasks simplifies the mechanics of a to-do list app.

GOOGLE TASKS is a minimalist to-do list. Google Tasks may be simple but it can be powerful when used in conjunction with Gmail and Google Calendar.

START ADDING TASKS

Adding tasks to the Google Tasks app can be as simple or detailed as you want it to be. You can create a simple checklist of multiple standalone tasks, or create tasks with subtasks, deadlines and comments. You will need to create a list for the task you are noting down. By default, all tasks go to the 'My Tasks' list that comes preinstalled in the app. However, if you

want to create a brand-new list, you will need to follow these steps:

- Click on the hamburger icon (three horizontal lines) on the bottom left of the screen.
- You will find a tab saying 'Create new list'
- Select that tab and enter the list title and then click on done.

Let's get on to creating the tasks.

- Click on the blue button in the bottom of the screen that says 'Add a new task'.
- Add your task and click on the save button.
- To add details to your task, click on the name of the task to pull up the edit page for the task.
- Google tasks will now

give you the option to add details/notes to your task, add a date (synced with Google Calendar) and even add a subtask to the main task.

To sync Google Tasks with Google Calendar, simply go to calendar.google.com and Select the Tasks option under My Calendars tab on the left-hand side panel.

SORTING, MOVING AND DELETING

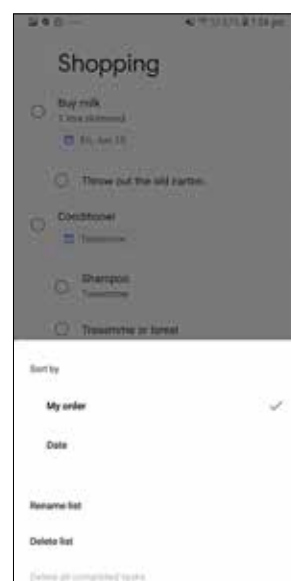

You can move around tasks in a list easily by long-pressing it. This will assist you to sort your tasks in a particular order. Another method to sort your tasks is by date which will list the tasks in order of imminence. Simply Tap the three dots on the left bottom side of the app and click on Sort by: Date.

To delete a task, you will need to click on the name of the particular task you want to delete and click on the bin icon on the top-right side of the screen. If you need to delete an entire list, click on the three dots on the bottom right side of the app and click on delete list. The app will prompt you for a confirmation before deleting.

EMAILS AS TASKS (GMAIL ONLY)

Google Tasks allows you to add emails (from Gmail) to your tasks which is handy. It copies the Subject of the email as the title of the task and even offers a link to the email in the task itself. To add emails to Tasks you will need to use Gmail on a desktop browser since the app

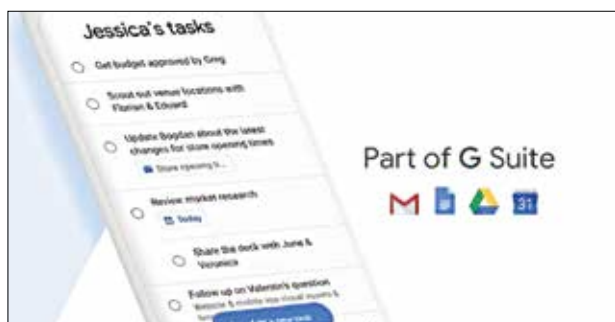

Sort tasks by date or your order and delete lists in this menu.

doesn't support this feature yet. Follow these steps:

- Select the email you wish to add as a task and open it up.
- Click on the 'More' drop-down and select 'Add to Tasks' among the drop-down menu options.

You can add important emails to your lists and have them be easily accessible in the form of a to-do-list. Unfortunately, there is no way yet to do this directly from the mobile Gmail app or the Tasks app itself.

The Google Tasks app can also add an email from Gmail on your tasks and sync with Google Calendar.
