GOTG 3 timeline

WHAT'S NEW

Steve Trevor is alive?

You've probably watched Wonder Woman starring Gal Gadot and Chris Pine (playing as Steve Trevor). You probably also remember watching Steve blow up in flames near the end of the movie. Few months ago, it was announced that the sequel will be set in 1984. Recently, director Patty Jenkins and Gal Gadot took to Twitter to reveal a first look at what to expect from the sequel. Although Gadot just posted a picture of Wonder Woman looking at a multiple television screens, it was Jenkins' tweet that led to speculation. She tweeted out a photo of Chris Pine with the caption "Welcome to WONDER WOMAN 1984, Steve Trevor! #WW84". Is Steve coming back from the dead? We'll probably learn more through trailers, or directly in the movie. This is probably a massive spoiler but

since the director herself thought of revealing it as the first look, we guess they have other things planned for the movie.

Marvel at SDCC

Kevin Feige, President of Marvel Studios, has already stated that they won't be showcasing anything in Hall H at the San Diego Comic Con this year. This means we won't be witnessing anything new from Avengers 4 and Captain Marvel. Fans have been eager to find out what was going to happen after half of MCU was wiped out with the snap of a finger. It looks like we won't

be getting anything anytime soon. However, this does not mean that Marvel won't be present at the convention. Sony Pictures might be planning a Hall H presentation with two

big movies coming out this year. Spider-man: Into the Spider-verse and Venom, both of which are highly anticipated. Venom stars Tom Hardy as Eddie Brock and is the first spin-off movie for Spiderman. Whereas Spider-verse is the first time that Miles Morales is being introduced to the cinematic universe, although it's set in its own universe.
