Tesla has reached an agreement with the artist whose artwork was used in the Tesla OS and other materials. <https://digit.in/Aug18-22-2>

GADGET CARE STARTUP EDITION

Whether it's a broken device or one that was stolen, these startups are out to help you not feel the pain as they repair or insure your gadgets.

T

here's no dearth of gadget owners in our country. There might have been one, about a decade or so ago, but

look anywhere today and you'll find people with at least a smartphone. In fact, according to a study by US-based media agency Zenith, India is all set to have 530 million smartphone users in 2018 - that is almost 40% of the country's population. Yet, when it comes to taking care of our gadgets,

most of us give it an occasional wipe and for certain categories, put it into a protective enclosure. When one gets broken or stops working, we submit them to the absolute mercy of a service centre or a local repair shop - often with no means to track the status of the operation. If that fails, we are left with no alternative but to shed a few heartfelt tears and shell out for a new piece. Don't even get us started about theft.

So why are we talking about everything that could go wrong with your gadgets? That's because in recent years, a series of startups have started

offering services that aim to solve exactly this set of problems in a number of ways. While there are startups that offer dedicated gadget repair services, there are some that take it one step further and insure your device altogether.

IT'S BROKEN? WE FIX IT

The smartphone repair market has been known to be largely offline and disorganised in our country. Apart from the dedicated service centres for the brand of smartphone that you own, there's no single standard that governs smartphone repair outlets, big or small. You are highly likely to get two completely different reports and price quotes in two unique stores for the same problem. There are quite a few startups trying to solve this problem.

JustLikeNew is perhaps the name most well known in this area. Started back in 2014, they've repaired more than 90,000 smartphones since inception, offering up front rates depending on the model you chose. Pick-up and drop services, along with a replacement smartphone, are not really rare in this segment. JustLikeNew specifically has partnerships with a number of smartphone parts manufacturers as
