

cash. You could simply use a regular expense tracking app. However, they are usually combined with the rest of your expenses. In order to isolate your travel expenses, you could use Trabee Pocket. The app lets you plan the expenses of your travel by first asking for your total budget. You can either choose to add your expenses during your trip or you can add them beforehand. It has a simple user-interface where you can add your expense under predefined categories. The amount you enter will be automatically deducted from your total budget. As you continue spending, the same will keep happening for all the expenses. Finally, all your expenses will be listed down, labelled with dates and you will get to see whether you overshot your budget or not. This will not only help you save money but also provide a way to plan budget trips without losing sight of how much you're spending on a particular aspect, like food or transportation.

TRANSLATE ON THE FLY

Communication is important when you want to ask for directions or when you're ordering food. If you don't speak or understand the local language, it can be painful. But, you don't really need to worry since Google Translate can take care of these problems. The app contains almost every language out there and it can be translated to every other language. Not just in the text form, it can also speak out the translated

word(s) for you. Additionally, if you can't read a sign or text, you can simply point the in-app camera and let it translate for you. This is done in AR mode and feels like a realistic overlay on the original surface. Another interesting feature is handwriting recognition. When enabled, you can simply ask the locals to write down in the local language and allow Google to translate it for you. If you're travelling to non-English countries, this app is a must have.

Chrome browser tab management

Tired of all the cluttered tabs on your Chrome browser? We have solutions.

Abhijit Dey |
abhijit@digit.in

AS TECH WRITERS, we tend to spend most of our lives opening new tabs as if we're paid for it. Before we realise, we all have opened so many tabs that not only

has the title disappeared but the favicons of the websites have vanished as well. While we're at it, we also spend an incredible amount of time searching for that one tab we lost at some point of time. If you happen to follow the same habit, you certainly

need to level-up your tab management skills like we did recently. The best way to keep your browser clean is to open the least number of tabs and only when necessary. Lower the number of tabs, the better you'll be able to focus on what you've been working on. However, if you feel like you need to keep looking at multiple tabs in your research, then

we have a few extensions that you could use. We'll be going through three browser extensions for Chrome to help you declutter your tabs. Using all of them will ensure that you don't lose your precious tabs while managing them as you execute your work or project.

SESSION BUDDY

While browsing, you might just be reading and watching videos based on a single type or topic of content. Eventually, you would have opened several tabs, all of them related to each other.
