

Twitter comes down on scams

Twitter is locking accounts that impersonate celebrities to trap people in cryptocurrency related scams. <https://digit.in/Aug18-40-1>

Watch VR videos together

Google adds "watch together" option in the YouTube app that allows friends to experience videos together. <https://digit.in/Aug18-40-2>

BUTTON-MASHING, NOW ON MOBILE

Taking mobile gaming to the next level

Abhijit Dey | abhijit@digit.in

P

erformance on mobile devices has immensely improved. Video games that you once played on your

consoles and PC are now playable on your smartphones. Mobile gaming back in the day used to be mostly around puzzles and endless runners. Casual gaming on mobile devices was the dominating demographic among

gamers. However, as smartphones became more powerful, graphic-intensive games started becoming more commonplace. Even mid-range smartphones were becoming powerful enough to handle these games. Based on your preferences, you might enjoy different types of mobile games. It could be a daily activity or only when you're bored while waiting or commuting. If you belong to the category

of gamers who dedicate their precious time to mobile gaming everyday, this comparison is for you.

While furiously tapping on your screen while shooting down enemies, have you ever tapped on another button by mistake? Say, you're playing a racing game and you kept missing the boost button at the right time because you couldn't see it. The number of mistakes you make might reduce as
