in India are from Indie artists", says Karthik from Comic Clan, "These artists develop their stories, do the artwork, take care of everything on their own - even the selling. Naturally, they cannot manage to do it at a large scale without taking something away from the creative aspect of their work."

Due to the restrictive margins put up by Amazon and Flipkart, it becomes infeasible for creators to rely on these platforms to drive sales entirely. Even though publishing houses like Graphic India have a slew of titles on ecommerce platforms like Devi, Ramayana 3392 AD and more, even they've moved their focus to creating more diverse content, including animation, rather than focussing just on comic books. As a result, comic book creators have mostly been trying to sell their work through their own websites. To solve this problem, sites like Comic Clan have come up, where you get a number of titles under one roof.

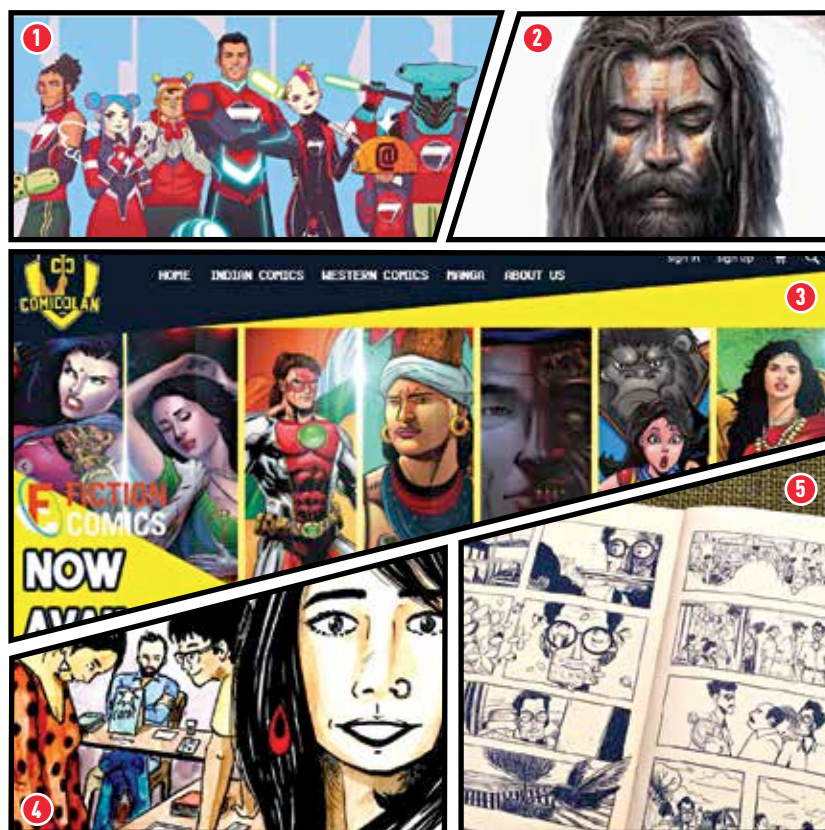

We reached out to Comic Clan to understand how their platform works. Started a mere 8 months ago, they sell about an average of 5-10 titles a day, mostly through recurring customers - although they sport a really impressive portfolio of Indian, western and manga titles. Essentially, for most Indian titles, Comic Clan contacts the publishers and creators to stock a few of their issues, which are shipped to you the moment you place an order. If they are not in stock, you're informed of the delay. "Sometimes, if the order is to be delivered in Mumbai, we do it ourselves", says Karthik, "While most customers shut the door on us after the delivery is done, every once in a while we get to talk to some hardcore comic book enthusiasts, understand their passion for titles - both Indian and international." For international titles, Comic Clan initially faced a huge turn around time due to shipping delays. To avoid this, they're trying to tie up with authorised distributors of those titles in our country and bring down the time it takes to make them available. Another name that might pop up in the future in this area is The Comic

Book Store Inc., which aims to set up physical comic book stores across the country and claims to have world rights to Marvel and DC comics.

### COMMUNITY

For a long time, Comic Con has been the only forum for geeks to get together and form a community. While it has grown to a large scale event across mul-

Indie Comix Fest provides a platform for Indie comic creators to exhibit their self-published creations and reach readers directly. It is held across the country throughout the year and you can check events near you at [indiecomixfest.org](http://indiecomixfest.org).

### FUTURE

There's so much more to talk about when it comes to the Indian comic book scene right now - both in terms of indie creations as well as titles from established publishing houses. Comics are cheaper to produce, easier to customise and can be sold to anyone of any age without any technical barrier in between. While distribution and visibility does seem to be an issue, all it needs is the right push. **A**
