Roomba 671

At around 30k, the Roomba 671 is one of the cheaper, and consequently lacking Roomba variants but it can still get the job done.

Like the previous Roomba we had here in the labs, we found that the 671 was quite good with its navigation. This one is pretty loud though, which might make constantly tracking it a bit of a chore. Although, according to iRobot, you certainly shouldn't have to.

The Roomba 671 comes with iRobot Dirt Detect technology, which supposedly recognises areas of high traffic where dirt collects up. It can also detect and avoid stairs, or any other drop off. With the more expensive variants, you get additional sensors which ward the Roomba

away from certain areas, or restrict it to cleaning within a certain radius, but you don't have that with the 671.

The 671 also works with the iRobot HOME app, which allows you to start it while you're away, schedule cleaning times and monitor the Roomba's status. If you happen to have a smart home, i.e., Alexa, it works well with that as well.

SPECIFICATIONS

ROBOT DIMENSIONS (DIA X H): 34 cm x 9.2 cm | **ROBOT WEIGHT:** 3.0 kg
| **CHARGE TIME:** 2 hours | **BATTERY RUN TIME:** 60 minutes* | **BATTERY TYPE:** Lithium-Ion | **BIN VOLUME:** 0.6 liter | **THRESHOLD CLEARANCE:** 2 cm

Amazon FireTV 2017

The Amazon Fire TV 2017 or Fire TV with 4K Ultra HD and Alexa Voice Remote is an immediate upgrade to the old Fire TV. The biggest upgrade is that it supports 4K and HDR. Additionally, it also supports Dolby Atmos audio.

The Alexa voice remote allows you to navigate the Fire TV using your voice. Simply press and ask Alexa. You can pair with an Amazon Echo device as well for a hands-free experience.

If you happen to have an Amazon Prime subscription, you immediately have access to its library. You can use the Fire TV to watch other services you may be subscribed to. Additionally, you can also watch live TV, with networks like Sony, NDTV, and more available to subscribe to. Additionally, you can also browse websites, your social media, and watch YouTube videos via a browser, such as Firefox.

Once it was out of the box, we simply plugged the Fire TV into our display and a power outlet, and it was on. After an easy set up and login, we were good to go. The remote is heavier than the previous iteration, and felt much better in our hands as well.

SPECIFICATIONS:

PROCESSOR: Quad-core 1.5 GHz | ARM 4x453 | **GPU:** Mali450 MP3 | **STORAGE:** 8 GB internal | **WI-FI CONNECTIVITY:** Dual-band, dual-antenna Wi-Fi (MIMO) | **BLUETOOTH:** Bluetooth 4.2 + LE | **PORTS:** HDMI output, micro USB for power or optional Amazon Ethernet Adapter (no included Ethernet port or micro SD slot)

GOQii Vital

GOQii has launched an all-new fitness band GOQii Vital with blood-pressure detection. The waterproof band, priced at ₹3499 at launch along with the 3-month Family Care plan, also comes with a full-colour OLED screen and a battery life that gave us close to 8 days of usage. GOQii's strength has been the ecosystem that its devices come with. Once you're signed up for the membership, you get a dedicated coach who will help you achieve your fitness goals. You also have access to doctor consultations and health experts to solve your health-related queries and concerns. Along with that, you have access to a community

of fellow GOQii users who you can compete against as well. The band comes with a particular exercise mode that can track specific details when you're cycling, working out or simply going for a run. Sleep tracking and heart rate tracking on the band work quite well. With the addition of new features on the band as well as the ecosystem, they've capitalised on that aspect. GOQii's Vital is definitely an effective device to go for if your aim is to get more than just data out of your fitness band and its app.
