

Fight over largest rubber duck

Numerous rubber ducks around the world are vying for the top position when it comes to sheer size. <https://dgit.in/sep18-62-1>

Guardians of the Gums

Check out this dental clinic channeling the Guardians of the Galaxy in its commercials and billboards. <https://dgit.in/sep18-62-2>

MAKE A LIVING OUT OF MEMES

ALWAYS IN TUNE WITH THE LATEST MEMES ON THE INTERNET? YOU COULD TURN IT INTO A CAREER

Arnab Mukherjee | arnab@dgit.in

While they might be a routine element in your daily social media and online lives, memes are also quite important. We even did an entire issue themed on memes! (March 2017) Today, they're used for a number of purposes. Apart from simply cracking a joke, memes are used in arguments to enforce a point, they're used in protests, they're used to express an opinion and a lot more. The world revolves around memes so much, that being a memelord is now a viable profession.

You read that right. An expertise in memes today is of high value and can get you a good job with companies looking to market themselves as relatable, witty and millennial friendly.

With the right approach, it can even make you an entrepreneur. So, why are you still sitting here and not minting money out of your meme knowledge? That's because one simply does not walk into meme expertise.

YTHOP

Gone are the days when you would head to some corner of reddit or 4chan to find fellow memesters who deal in the dankest of them memes. Today, everybody, from political figureheads to representatives of foreign nations are indulging in memeing - sometimes to generate public goodwill, sometimes to bring their opponents down. Some say that memes have reached the same position as propaganda posters of yesteryears.

Along with that, with similar intentions, major companies are delv-

ing into memeing to generate a good rapport with their customer base and seem trendy. There was a certain level of interest towards memes during the late-1990s and the early 2000s. There are social media profiles of otherwise serious companies that indulge in a healthy dose of meme humour, and even encourage memes on themselves, to connect with their clientele. In such a market, someone with an expert-level knowledge of memes, someone who can put their finger on the next viral meme sensation to hit the interwebs is clearly invaluable.

TEACH ME, SENPAI

So, how does one become a 'meme expert'? Well, the obvious answer would be to dwell on the interwebs, the hallowed depths of reddit and 4chan, and know all about the latest memes. However, that merely makes you a memer, not a meme expert. For that title, you need to know the origins of memes, their true purpose, their variations and a lot more. A couple of canonical sources to do that would
