

Ryzen™ NAS with graphics processing to facilitate AI-oriented tasks

Absolute performance with AMD Radeon™ and NVIDIA® graphics cards

Install an AMD Radeon™ or NVIDIA® graphics card (sold separately) into the TS-1677X and use its immense processing power to quickly build, train, and optimize AI model-based services.

PCIe expandability for 10GbE support and more

PCIe expandability allows you to upgrade the core functionality of the TS-1677X by installing graphics cards, 10GbE/40GbE adapters, QM2 cards, USB 3.1 10Gbps cards, or wireless network cards.

Optimize your storage efficiency with Qtier and SSD caching

Use Qtier Technology and SSD caching to optimize NAS performance, accelerate data access, and improve all-round system efficiency.

Higher reliability and performance with RAID 50/60

The TS-1677 supports RAID 50/60 storage pool configurations for higher data protection and performance.
