

digit TOP 10

BEST PHONES UNDER ₹10,000

It has been a good year for smartphones. New features like the display notch, glass-sandwich designs, in-display fingerprint sensors and more have shaken up the market. The budget segment also has seen a lot of action and there are now many smartphones to choose from in the sub-₹10,000 price range. Let's look at a few good ones —

1

Realme 1

The mid-range phone doesn't look like a mid-range phone at all. It has a stunning diamond glass design and an equally maxed-out spec sheet. It has MediaTek's top-of-the-line Helio P60 chipset inside that is paired with a discrete APU for AI tasks, along with 3GB of RAM. Go for this if you want a productivity enhancing phone with a good design.

3

Realme 2

The Realme 2 has a good-looking diamond-glass design with a notched display up front. The rear panel houses a dual camera unit and a fingerprint sensor while under the hood is a Qualcomm Snapdragon 450 chipset. The variant under Rs 10,000 comes with 3GB RAM and 32GB storage. It's a handy phone for someone who isn't a power user.

Xiaomi Redmi Note 5

Xiaomi's Redmi Note 5 is now the best smartphone to buy under Rs 10,000. In terms of performance, the Snapdragon 625-powered device outperforms almost all devices in its price range. It also has very reliable battery life, comes with an all-metal construction, along with a fingerprint sensor at the back. Buy this if you are a power user and want a long battery life.

4

Xiaomi Redmi Y2

The Redmi Y2 has more going for it than just a selfie-centric phone. There's a reliable mid-range processor, albeit old, and a stellar front camera with a equally reliable dual rear cameras. The front camera relies on pixel binning to give better selfies while MIUI 9.5 means a feature-rich experience.
