

5

Moto G5s

The mid-range compact phone of choice from Moto last year is now priced at Rs 10,600 in India. It is powered by the Snapdragon 430 chipset coupled with 3GB of

RAM and a single 16MP camera at the back with commendable image quality.

8

Xiaomi Redmi 6

The Xiaomi Redmi 6 is the first Redmi device in the entry-level segment to have dual cameras. You get a 12+5MP camera on the back and a 5MP shooter up front. With a 12nm MediaTek Helio P22 SoC and a 3,000mAh battery, it also boasts of a two-day battery life.

6

Infinix Note 5

The Infinix Note 5 is an Android One-powered device that runs on stock Android and promises regular update. It's the phone to get if you are finicky about a secure operating system. It packs a MediaTek Helio P23 octa-core chipset coupled with 3GB RAM and 32GB storage. It's also quite good for photography as it packs a 12MP rear camera and a 16MP front camera.

9

10.or D2

The 10.or D2 is part of the 'Crafted for Amazon' program and offers a stock Android experience in the budget segment. The phone is powered by a quad-core Snapdragon 425 chipset coupled with 3GB RAM and 32GB storage and touts a 13MP camera on the back and a 5MP shooter up front.

7

Honor 7C

The Honor 7C has a metal unibody design with a Snapdragon 425 chipset underneath coupled with 4GB of RAM. The phone has dual cameras at the back along with some AI-centric features.

10

Infinix Hot 6 Pro

The Hot 6 Pro is a phone from a relatively new brand that left us quite impressed. It works fine with a Snapdragon 425 SoC under the hood and 3GB RAM and 32GB storage. At the back is a dual camera unit that also is quite impressive for its price.
