

Jio offers eSIM

The latest iPhones will support dual sim, with one of the options being eSIM, currently offered by only Airtel and Jio in India. <https://digit.in/oct18-40-1>

State governments use cloud

According to an AWS, the Indian state governments are rapidly moving their workload to the platform. <https://digit.in/oct18-40-2>

Lenovo Yoga 730 (13IKB)

A more substantial Microsoft Surface Pro

T

he Lenovo Yoga 730 comes with a 13.3-inch IPS LCD touchscreen with

two display resolution options: UHD and Full HD. Along with the convertible laptop, you get a Lenovo Active Pen 2 for Yoga. In our experience, pen inputs happened naturally with no noticeable latency.

Despite the subtly etched JBL badge at the bottom, there was nothing special about the sound that emanated from the Yoga 730's two tiny down-firing speakers. Touchpad experience on the Lenovo Yoga 730 was just as satisfying as the keyboard experience. The Lenovo Yoga 730 knocks only sixers in the performance department. Not only did the review unit perform admirably in our benchmark tests, but it also proved itself worthy for everyday use. Through all the tests, however, the Yoga 730's battery did not last over 5 hours on a full charge.

One thing's for sure: the Lenovo Yoga 730 is definitely worth its salt. What we're not sure about are its short battery life and steep price tag. The Lenovo Yoga 730 is a versatile device that's ideal for users who want it all: speed, portability, writability, and comfort.

—Vignesh Giridharan

SPECIFICATIONS

PROCESSOR: Intel Core i7-8550U Processor (1.80GHz 2400MHz 8MB) | OPERATING SYSTEM: Windows 10 Home 64 | DISPLAY TYPE: 13.3" FHD IPS AntiGlare LED Backlight 1920x1080 | MEMORY: 8.0GB PC4-19200 DDR4 Soldered 2400MHz | HARD DRIVE: 512GB SSD PCIe | SPEAKER: JBL speakers | AC ADAPTER: 65W | GRAPHICS: Intel UHD Graphics 620 | PORTS: USB 3.1, USB 3.1 Type-C / Audio combo jack / Wi-Fi + Bluetooth 4.1 / WEIGHT: 1.12Kgs | BATTERY: 4 Cell Li-Polymer | BLUETOOTH: Bluetooth Version 4.1 | WIRELESS: Lenovo AC Wireless (2x2)

AMD Ryzen Threadripper 2990WX

Leapfrogging to the finish line

A

MD's latest foray into the HEDT space comes in the form of

the remarkable Threadripper 2990WX, a 32-core / 64-thread processor that's been setting new benchmark records world wide. It's based on the same 12nm process as the recently reviewed Ryzen 7 2700X but with twice the number of cores. It's still compatible with the X399 platform so you can easily upgrade to this 2nd Gen Threadripper with just a BIOS upgrade. However, you should ensure that your PSU can provide the wattage that the 2990WX consumes at peak load, which can go all the way up to 600 Watts!

Coming to the performance aspect, in Cinebench R15 multi-threaded run, the 2990WX scored a massive 5034 points. The 7980XE, in comparison, managed to get 3406 points. That's a 47.8 per cent increment in performance. When compared to the previous gen Threadripper 1950X it has a 67 per cent increment in performance. These are unheard of numbers between generations. However, when it comes to gaming, Intel is still ahead with both HEDT and mainstream CPUs being better. That's not to say that the 2990WX is bad for gaming, it's just that your money is better spent on a beefier GPU if gaming's the sole purpose. We're excited to see how the competition will respond.

—Mithun Mohandas
