## FEEDBACK FOR THE OCTOBER 2018 ISSUE OF DIGIT

Send your feedback at  
[editor@dgit.in](mailto:editor@dgit.in)

Hello Team Digit!

First of all, thank you for being my favourite and number 1 source of tech news! Being an engineering student, I give all the credit to Digit for all the technical skills I have learnt and implemented in my college life. Keep the great work up!

Now coming to my request, I would really love it if the Fast Tracks in the upcoming issues would cover the topic like Internet of Things, Big Data, Machine and Deep Learning. These are really popular technologies and even though one can learn a lot from surfing the net, the content you provide in the Fast Tracks is far better than any online content! Some of your Fast Tracks have actually helped me through my college projects! I was hoping that the upcoming Fast Tracks could cover the topics mentioned above since a knowledge of these topics would really help me in my college placements (beginning next year).

Looking forward to hearing from you! Keep rocking!

A Digit lover since December 2012 [Ironically, "The Last Issue?" was my first issue!]

—Siddharth Gulati

Hi Siddharth, thanks for your mail. It really is ironic that the last issue

was your first, though we hope your last issue never comes :-)

Coming to your Fast Track suggestions, we have covered Big Data in April 2016, IoT was May 2015, and we've done AI in December 2011 and Robotics in April 2017. We will try and cover more about machine learning in 2019.

—Mithun

Hey folks!

I am writing after almost a year and only thing I can say is kaise kar lete ho yehh sabb? I mean how can you be so awesome? At times I feel I am lucky enough because Digit exists. The articles are wonderful so are the others like reviews. And boo-man... he really shows me the other side of the coin. Nice. I always wait for what he has to say. I kinda like his stuff.

And, does RSS feed mean Robert Sovereign-Smith feed? BTW, here is my short reevu of October edition. The blockchain stuff was nice, the AI was exciting, so was cult and I am really thankful to you for providing those astronomy software. Overall it was packed with good stuff which left me wanting for more. And can I ask how many pani-puris he gave for 12 rupees?

And can you do a Dmystify on AI? like the case at Facebook where supposedly their AI developed their own

Robert, I always loved digit. When I am 5 then my dad buys digit now I buy. He has a huge cool-lection (cool+collection). Now when I buy digit he reads (I am a subscriber). Your mag is the best mag I have ever seen. I like all the articles, product reviews, tips n tricks, games etc. Now I have some suggestions, complaints for you

1. I am a subscriber but i always receive copies late.  
 2. Can you please stop giving indie games and give some good games. You can give just one but PLEASE GIVE A GOOD GAME....  
 3. You can give game walkthrough.

But don't get my first two suggestions wrong, you are the best and keep this up. And our favorite is tips and tricks, agent 001 diy. thanks for everyone.

—Nishanta Nibir Borgohain

Hi Nishanta, thank you for your mail, and thank you for the positive feedback, we really appreciate it when readers take time to write in to us, so please keep doing so when you feel the need to express something.

I will have my subscription department contact you and sort out the late delivery issues. Sometimes changing couriers works wonders, though, sadly,

shorthand communication. Pardon me if you have already done it.

And i am eagerly waiting for the December issue. Lots of love to you guys and all the best for future!

—Aditya Patnaik

Thanks for your email Aditya, we'll look into implementing your suggestions. And yes, one of our designers named that column because of my name. It just kind of stuck...

Dmystify is a core science book, and does not cover technology topics. For that we have the Fast Track, and we have done a Fast TRack to AI in our December 2011 issue. You should write in to [archive@dgit.in](mailto:archive@dgit.in) and ask for access to the PDF archives, so that you can read the older issues online for free.

—Robert
