

10 second limit, Instagram stops at the 15 second mark. You have to start recording again and it messes up with the continuity if it's a long shot. To make managing this easier, Story Cutter for Instagram does this for you automatically. This means that you can record a full-length video and the app will trim them into multiple video clips. In the free version, the app will trim your video into 10 second clips. If you buy the full version, then you can create clips of 15, 30, 45 and 60 seconds. After selecting the desired video, it will process the video and trim it up. You can then view how the video will look like in the Story. If satisfied, you can go ahead and upload the videos sequentially to your story.

GIVE YOUR PHOTOS AND VIDEOS A VINTAGE FEEL

The app called Vintage Camera Lite (formerly 8mm) allows you to control several aspects of the vintage ef-

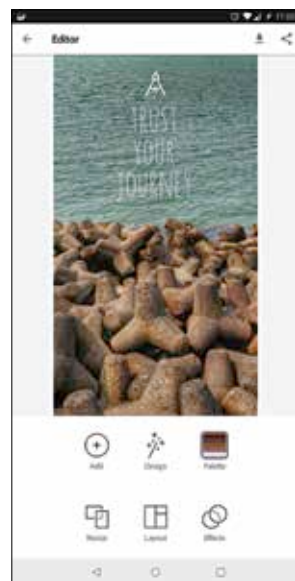

fect. Right from year based frames, to manual settings such as changing the colour balance, highlights, shadows, etc. You can take both photos and videos in this app. After saving, you can directly share it as an Instagram story. For Snapchat, you'll have to manually share it from the saved photos or video.

MAKE ANIMATED STORIES

Typography is a good way to beautify your stories. Adding some animation to them will definitely make people watch it twice or thrice. We aren't talking about overlaying some sticker but actually adding moving text and animating the images. Both can be done in Adobe Spark Post. This is another app that serious Story makers must use. Apart from supporting numerous presets of aspect ratios of almost all platforms and various other layouts, it allows you to animate the text and the images. As you launch the app, you're given hundreds of templates so that it's easier to begin. From there, you can jump into Animation under Effects and apply the desired animation you'd like. The number

of animations for text and images might seem limited for now but considering the hundreds of templates, all your stories will look unique for a long time.
