

Pokémon Go gets new Pokémon

Pokémon Go's latest game update brings in 4th generation of pokemons for players to expand their pokédexes. <https://digit.in/nov18-45-1>

A waterproof Kindle Paperwhite

The latest Kindle Paperwhite gets IPX8 waterproofing along with 8GB of storage on the base model. <https://digit.in/nov18-45-2>

Shielding for components

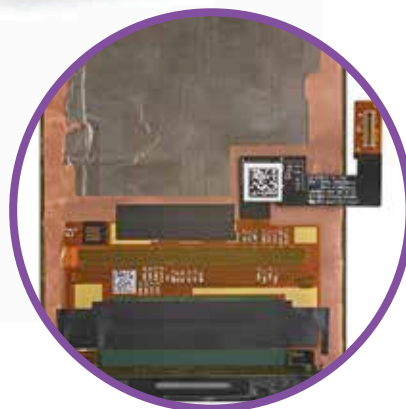

The Pixel 3 isn't only relying on the foam adhesive around the frame for waterproofing. There's double the shielding over the south area of the phone. In order to access the speaker chamber, the waterproof adhesive has to be broken.

Google
Pixel 3 XL

Display panel switch-up

The Pixel 3 XL went with Samsung's AMOLED panel this year. However, the Pixel 3 uses an LG OLED panel. Previously on the Pixel 2 and 2 XL, the case was the opposite where a few units of the Pixel 2 XL faced display issues with the LG panel. We'll get to know whether the same issues persist on this one.

Dual-front camera

While everyone is using a dual (or more) camera module on the rear for Portrait shots, Google decided to add two cameras on the front. Functionally, one is a wideangle camera while the other is an ultrawide camera. This will allow users to fit more people in their selfies and the angle can be changed from the camera app.
