Huawei's latest smartphones to come with its own Nano memory cards which are 45% smaller than a traditional microSD card. <https://digit.in/nov18-67-2>

In the quest to spice up their social media feeds, more people from India have died taking selfies than any other country in the world. This is a list of locations and situations where selfies have killed people.

Aditya Madanapalle | aditya@digit.in

In India, most selfie related deaths are caused due to snaps that are attempted near water bodies

Selfies from heights are the number one cause of selfie related deaths worldwide

Another stupid and dangerous trend being seen is taking dramatic selfies with oncoming trains

Wild animals can be spooked if you get too close to them, and react in unpredictable ways

Whether you are a pedestrian or a driver, avoid selfies while on the road

It is never a good idea to place plugged in power tools near your face

Selfies with firearms are dangerous to yourself and others as well
