

The Renault EZ-GO Concept is a robot vehicle that drives itself while letting its occupants continue their day at work. It allows up to six passengers to sit in a booth fashion, making for easy meetings and conversation. It has no driver's seat or steering wheel. It's completely electric-powered.

PARIS MOTOR SHOW 2018

The Renault EZ-PRO Concept is a robot vehicle for transportation of both passengers and goods. It can be configured to deliver goods autonomously right up to the last mile or host a human concierge for say, running a food truck. It drives itself around the city on electric power completely by itself.

The Renault EZ-ULTIMO Concept is an all-electric luxury limousine for short hauls. It's designed to drive around completely by itself. On the inside it features a large armchair and a table for two. It's 5.8m long and has a range of up to 499 km on a single charge.
