

## Google Pay spreads its wings

Google Pay adds support for 32 additional banks in the US along with the 1,700 US banks it originally supported. <https://dgit.in/dec18-25-1>

## Google Assistant gets better on iOS

Google Assistant got more convenient to use on iOS because of Siri shortcuts that can send you over to Assistant. <https://dgit.in/dec18-25-2>

Android Studio will let you convert to WebP easily.

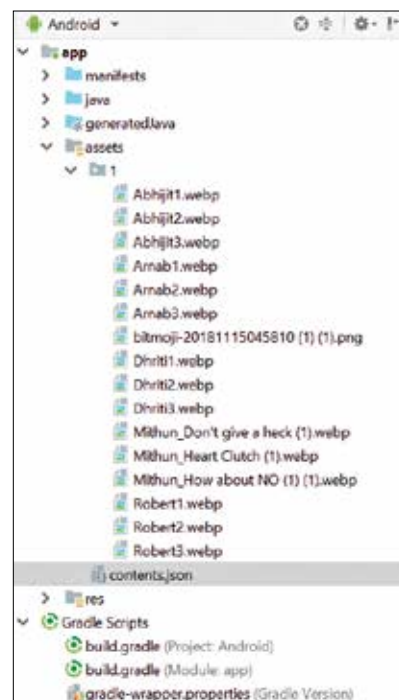

- Android play store link and iOS app store link: Input your app's Play Store link and your iOS app store link (if you have an iOS version of the app) in these fields. This enables users to be directed to your app in the respective store if the recipient clicks on any of your sticker creations.
- Emoji: You can add up to three emojis for each sticker that describe the emotion of your sticker. WhatsApp will soon support a search function for stickers based on emojis or emotions which will help categorize your creations.

- These fields are optional and need not be inputted with any data: ios\_app\_store\_link, android\_app\_store\_link, publisher\_website, privacy\_policy\_website, license\_agreement\_website, emoji.
- If your app contains more than one sticker pack, simply create a new array in the 'sticker packs' section of the contents.json file and enter all the metadata for the new pack as well along with the names of the images files.

### FINAL TOUCHES

There are a few final steps that need to be taken care of before submitting your sticker pack app for WhatsApp. Let's hit a home run on these!

- First, change the app's icon or the launcher icon which will be displayed in the Play Store as well as the app drawer of the user. Navigate through

Replace all existing files with your own sticker WebP files and PNG tray icon.
