WHAT'S NEW

Gotham season 5 origins

Before the Dark Knight, Gotham was ruled by mob bosses and villains who mostly found enemies amongst themselves and the GCPD, especially James Gordon. After running successfully for four seasons, Gotham is entering its final season next month. Through the seasons we got to witness the origins of several iconic villains of Gotham and the humble beginnings of Batman. But now, we are finally going to see how Bruce Wayne takes the leap to become Gotham's masked vigilante. Apart from Batman, we might also get to see the origin of the Clown Prince of Gotham

or the Joker who hasn't been officially introduced yet. Looking at the trailer of season 5, it seems like we're in for a roller-coaster ride throughout.

Can Infinity War be topped?

Many box office records were shattered with Infinity War. It was the culmination of the entire universe that the MCU built over the decade through 22 movies, all of them inter-connected to a bigger storyline. Doing justice to the endless roster of characters and superheroes was almost a Herculean task and the Russos stood up to it and delivered. But will the Russos be able to do it better in the next and final instalment? Well, they aren't really trying to achieve that and instead want to tell a better

story with the characters. Considering this is going to be the final movie for many characters in the MCU, all their character arcs deserve a worthy completion. Although there are lesser characters to deal with in the next movie, thanks to "The Decimation", it's still going to be a

considerably complicated story.

The title was something that Marvel had been holding back for a long time. However, they finally did the title reveal along with the first teaser trailer. They've carried on the grim mood from the events of the previous movie and they haven't really given out much. Reports say that they aren't going to show beyond the first 15 minutes of the movie. It's also said that the movie could probably have a three-hour runtime.
