

CS:GO now free to play
CS:GO is now free to download and play on Steam and has introduced a battle royale mode called Danger Zone. <https://digit.in/jan19-53>

Snow map on PUBG
Vikendi, the snow map, has finally made its way to PUBG mobile, available on Android and iOS devices. <https://digit.in/jan19-54>

Data gathered from astronomical instruments, a deeper understanding of physics and increased computation power have allowed researchers to create better simulations of black holes

Aditya Madanapalle | aditya@digit.in

JP Luminet used primitive computers and ink dots on paper to create this rendering of a black hole with an accretion disk in 1979

This simulation based on data gathered by ESO's GRAVITY instrument shows swirling gas just outside a black hole's event horizon

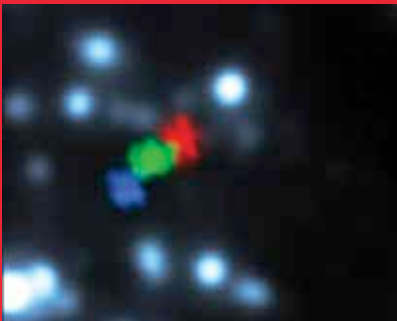

This is a more scientifically accurate visualisation of the Gargantua black hole from Interstellar, with a faster moving black hole

An ESA simulation of what would it look like if a black hole showed up in the skies above the Earth

This is a jet of electrons that stretches for 5000 light years, originating from a black hole at the center of the M87 galaxy

Images captured by the Very Large Telescope show clouds of gas being ripped apart by the black hole in Milky Way

An artist's conception of a pair of colliding black holes based on gravitational waves detected by LIGO
