

MOVIE

Spider-man: Into the Spider-verse

★★★★★ | If you've been only into the Spider-man movies, then his real identity will only be known to you as Peter Parker. However, there are several versions from multiple comic-book universes out there collectively forming the Spider-family. One among them is Miles Morales, whose story is depicted in 'Into the Spider-verse'. He shares the same universe as Peter and obviously gets bitten by a radioactive spider. While the movie is centered around Miles discovering his motivations and his powers, there are several other characters in the movie, which might seem overwhelming at first. However, every character has been beautifully written with enough screen time. There have been several callouts to the previous movies throughout. This movie is a reminder to what makes anyone Spider-man.

Apart from the incredible story, the animation is probably among the best we've seen. The art is heavily influenced by comic book panels and it has been adapted on the screen wonderfully. It deserves to be watched on a big screen, preferably IMAX because there's so much happening and immersion will only enhance the experience.

Are we saying that this is the best animated movie of 2018? Yes. Are we saying this is the best Spider-man movie ever made? Definitely, yes.

COMIC BOOK

Aghori Book 03

★★★★☆ | With the third book in the Aghori Origins series, the story takes us back to another social issue in line with what happened in the first two books. This time, Vira has to solve a series of paranormal killings perpetrated by a ghost child. But before that, the story picks off where it left off with Book 02. We can say that the social issue at hand here is one that is quite prevalent in India and it is good to see that comics are being used as a medium to raise awareness on the same. Putting that case to rest sees Vira finally getting the chance to get the answers he's been looking for, all these years.

The cover art is quite different from the last two issues with its adherence to black and white, with just a dash of blood. Vivek Goel's artwork here sets the eerie tone for this issue. Some of the panels in the issue are simply breathtaking, especially the one with a lotus (you'll know it when you see it). The storytelling of Ram V is fabulous as the issue jumps between Vira's training as a new Aghori and his present-day activities. The art in the first half of the book and the second half is evidently distinct, and that is because there are some changes in the pencillers and colourists between the two. The colouring aptly sets the tone of every panel and page. There's a lot of typos, with some of them occurring at very significant points of dialogue. Beyond that, this issue is on the cusp of a very satisfactory conclusion to this arc.

UP AND COMING
