

Huawei Mate X Folding phone

This video shows the Huawei Mate X might just be the most promising foldable phone we've seen yet. <https://dgit.in/mar19-50>

Built-in cryptocurrency wallet for S10

Samsung is one of the first major smartphone makers to include a cryptocurrency wallet in its Galaxy S10 phones. <https://dgit.in/mar19-51>

Easy access

Nothing much stands between you and the insides of the Mac Mini. The plastic base or cover and the perforated antenna plate easily comes off. With no presence of strong adhesives, you won't be spending time in peeling things off.

Apple Mac Mini 2018

Adopting eco-friendly design

Apple has used eco-friendly materials in several parts. The bottom cover is made from 60 percent recycled plastic. Its fan uses 27 percent bio-based plastic and overall, it generates 45 percent fewer emissions compared to the older models.

Modular power supply

The power supply at the bottom has no tools or adhesive holding it down. Hence, in case of any malfunction later, it can be easily replaced without any stress. As for the power, it gets a bump to 150 watts from 85 on the previous model.
