### Eye Resolution VR for \$6000

Varjo VR-1 is commercial grade VR headset that offers you previously unheard of visual fidelity, but costs a bomb. <https://digit.in/mar19-84>

## Zebronics Max Pro

Worthy to be your first mechanical keyboard

Price  
₹3,999

**Z**

ebtronics entered the mechanical keyboard space in 2016 with the

Zebronics Max TKL. It used knock-off or MX-compatible mechanical switches from Outemu that are based on Cherry's design with minor changes. Their latest keyboard is the Max Pro that uses more durable switches lit with RGB lighting.

For its price, the Zebronics Max Pro delivers surprisingly superior build quality. Given the low-cost, it provides all the basic features and bling you'd expect on a gaming keyboard. At this price, more interested users will be able to afford one and upgrade from the inferior mushy membrane keyboards. You get full N-key rollover with anti-ghosting implemented. It will take care of all your gaming requirements unless you're highly dependent on macros since that's missing. Software support is absent but you don't really need it since all the lighting effects can be controlled with the onboard keys.

Gaming or typing, you can comfortably use this keyboard for both use-cases. The Outemu Dustproof Blue switches used on the Max Pro are clicky and tactile, and the keyboard comes only in one switch variant which is a bummer. Quality control is slightly poor in the budget segment or low-cost keyboards, hence it's best to individually check whether all the keys (and LEDs) are functional. You must buy them from official channels that provide warranty in case of hardware failure. With an attractive price, the Zebronics Max Pro could be a great addition to your gaming arsenal.

—Abhijit Dey

### SPECIFICATIONS

KEYBOARD SIZE: Standard, Numpad included (104-keys) | KEYBOARD BACKLIGHTING: RGB | SWITCH TYPE: Mechanical (Outemu Blue 50-million lifecycle) | POLLING RATE: 1000Hz (1 ms) | KEY-ROLLOVER: Full-key rollover | INTERFACE: USB 2.0 | DIMENSIONS: Wide - 44.62 cm, Length - 16.98 cm, Height - 3.79 cm | CABLE LENGTH: 1.8m | WEIGHT: 1.3 kg | WARRANTY: 1 year

## Samsung Galaxy M20

Good with the camera, struggles with performance

Price  
₹12,990

**T**

his is the first Samsung phone in India to sport a

notch of any kind. The earpiece is placed on the top edge, while the notification LED is MIA. The Galaxy M20 retains the 3.5mm headphone jack and even houses a USB-C port for charging and data transfer. In terms of display, the 6.3-inch panel on the Samsung Galaxy M20 left us quite impressed. It might just be the best thing about the smartphone.

Overall, the Samsung Galaxy M20 is a mixed bag. It's good in certain aspects but fails miserably in others. A new design, a wide-angle camera, a new processor and a massive battery come with the M20. All of that should make it a strong contender for the best mid-ranger available right now, a highly contested title to begin with. However, the company missed out on offering good performance, a crucial factor that influences a purchase decision. The M20, while giving users options to experiment with the cameras, also stops short at offering full-fledged customisation by locking out pro-mode for the wide-angle lens. Lastly, Samsung's decision to put ads in the lock screen is a bad move and might make buyers look elsewhere.

With options like the Asus Zenfone Max Pro M2, Honor 10 Lite and the Redmi Note 6 Pro available for around the same price, the Samsung Galaxy M20 is only a viable option if you absolutely must have a wide-angle camera. For everything else, there is a better alternative.

—Subhrojit Mallick

### SPECIFICATIONS

DIMENSIONS: 156.4 x 74.5 x 8.8 mm | WEIGHT: 186 g | DISPLAY: TFT 6.3 inches | RESOLUTION: 1080 x 2340 pixels | CHIPSET: Exynos 7904 Octa (14 nm) | GPU: Mali-G71 MP2 | INTERNAL MEMORY: 64 GB, 4 GB RAM or 32 GB, 3 GB RAM | EXPANDABLE: Up to 512GB
