

digit diary

If you are ever curious about what the **Digit gang is up to**, this is the place to get all the inside info. From the **latest game we're obsessing about** to the newest intern we're driving up the wall – it's all here folks.

Have you heard of Ultimate Werewolf? It's a card game and Aditya, who's big on card games, recently got his hands on the Deluxe Edition. A few days later, we started noticing some changes in the way Aditya was behaving. He started coming in later than usual, would turn off all the lights around his desk and act really uncomfortable while the sun was out. Come evening and he'd get a lot more active. We're not saying that he's been turning into a Werewolf but that he's been playing the game way too much. We'll stay alert on a full moon night, just in case.

Summer's here and you know what that means... ALL OUR ACs STOP WORKING! YAAAAAY! Brands might falsely claim that their products have AI but we know for a fact that our ACs do have AI. How else would they manage to conk off at the worst possible time of the year? They're sentient I tell ya! And when the temperature drops, the rats

get more active. One wouldn't be wrong to assume that the rats have been colluding with the ACs.

Apex Legends came out earlier this month, the free-to-play battle royale game by Respawn. We've had enough of PUBG already and a fresh take on the BR genre was much welcome. While we haven't been playing Apex Legends with the same gusto as we did when PUBG came out, it's slowly turning out to be everyone's go to game.

Coming to Abhijit, if any of you've met the guy in real life, then you'll know that he's lanky. Of late, we've seen him watching way too many fitness videos on YouTube. Not that we're against someone taking efforts to workout, it's just that you need to have something to work on, in the first place. Alas for Abhijit, it would seem that the universe

is acting against his desire to have a rocking bod, because the gym that he was going to shut down out of the blue. Abhijit and his beefcake buddies have been hounding the cops ever since to get hold of the gym owner who's been absconding with everyone's money.

Did we mention that we had the opportunity to play with an AI robot? We got the Miko 2, a learning aid aimed towards helping kids get familiar with robotics.

It supposedly has a massive database of questions that kids might ask. So... we asked it questions that "curious" kids might ask. We didn't just ask, we interrogated it for hours on end. If there was ever a real life equivalent of a brute force attack, then we're proud to say that we did it. The verdict? Let's just say that the bot is kid safe. Overall, it's a safe bot for your kids to play with.

QUOTE OF THE MONTH

"Wanna play?"

– Non-gamer Knidarius

DISCUSSIONS

Every month we will highlight some of the more interesting discussions happening on our Digit Forum (digit.in/forum). Head over and join our forum if you want quick answers to your queries from some of the geekiest Indians online. In case you love giving gyaan, or even if you love arguing with others, the Forum is the place you should be.

Tom & Jerry hate

<https://digit.in/tjhate>

Most of our forum members enjoyed Tom & Jerry during their childhoods. Now, they explore the reasons why videos of the show on YouTube have such a large number of dislikes.

Wireless file transfer

<https://digit.in/wifile>

The Digit community suggests various applications for wirelessly transferring files between two Android smartphones, with the requirement of the app working over Wi-Fi hotspots.

Roaches helping China

<https://digit.in/roaching>

China is using an innovative approach to dispose off over 50 tonnes of household waste a day, by keeping cockroaches captive in cells, and feeding them the waste through pipes.
