

58 | From science fiction to science fact

An exploration of how common technologies depicted in science fiction are closing in on becoming reality.

63 | Rantz

Foldable phones are stupid and manufacturers need new ideas soon.

64 | 1000 words

These are the most useless things that we've sent to space.

AND MORE

88 | Geek-key

The participatory nature of fandoms has led to different kinds of activities emerging within these communities.

90 | Infoporn

A timeline of the last ten years of some of the top apps in the smartphone stores.

92 | Backtalk

Our interactions with the big wigs of the industry, this time with Oracle, Route Mobile and Seagate.

AND MORE

68 | Cutting through the fog

Research from MIT could give autonomous vehicles better vision in fog and dust.

72 | The Square Kilometer Array (SKA)

A radio telescope being built to understand the origin and evolution of the universe.

80 | Origins of surgery

From painful, barbaric practices, to the extreme precision of modern day, the evolution of surgery deserves attention.
