A COLLECTION OF PRO TIPS FOR EVERYTHING. Without being limited to a particular topic, these tips are from popular software, to coding, to browsers, search, storage rules, password rules, mobile device hacks, bios cracking, tweaks explained and everything tech under the sun.

Spotify

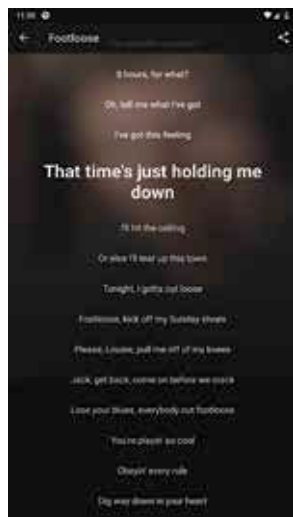

The Facebook of music streaming services has finally launched in India.

NOW THAT SPOTIFY HAS FINALLY LAUNCHED IN INDIA, you might have already tried out the service, whether the free version or premium. Being one of the oldest music streaming services, it has been polished into a refined service. Spotify is feature-packed and we will be going through certain tips that will enhance your music streaming experience.

LOOK UP LYRICS IN REAL-TIME

While Spotify does include the Behind the Lyrics feature where along with song lyrics, it shows you some trivia around the song, the database isn't large enough. There are many songs whose lyrics aren't available. An easier way to get the lyrics is using Shazam. Fire up Shazam while the song is playing and tap on the discover button. It will recognise the song and pop up all the details. Tap on the 'Lyrics' tab and it will recognise what part of the song is playing and accordingly display the lyrics in real-time as the song plays. Do note that this feature is applicable to songs playing on any music app.

QUICKLY ADD TRACKS DISCOVERED IN SHAZAM TO A PLAYLIST

If you're a heavy Shazam user, you might want to go back to the songs that you discovered at random places. While the history of all your searches are saved in Shazam, you'd have to manually play them one by one. There's an easier way to add them to a playlist on Spotify. Open up Shazam and go to the settings menu. Here, you can connect your Spotify account to Shazam. This requires a Spotify Premium subscription. If you don't have one then you will have to manually create a playlist and add the discovered tracks to it. After connect-

ing your account, you can play the entire song using Spotify instead of listening to only the preview, and you can also open the song in the app. When you connect your account, a playlist 'My Shazam Tracks' will automatically be created.

AUTOMATICALLY CREATE DISCOVER WEEKLY PLAYLIST

IFTTT consists of an endless number of recipes around Spotify. So much so that it deserves its own article on the best ones. We'll be going through only a couple of them here that can be quite useful for your listening experience. Spotify is well known to have a powerful recommendation engine. It creates a Discover Weekly playlist every Monday and resets next week. You end up losing this playlist if you don't follow it or save the songs manually. IFTTT has a recipe that will automatically create a playlist for you called 'Discover Weekly Archive'. To

do so, you will have to create an account on IFTTT and then connect your Spotify account. Once connected, you can turn on the 'Automatically create a Discover Weekly archive' applet (<https://digit.in/SptfyD-WIFTT>) and the rest will be taken care of by the service.

CREATE PLAYLIST OF LIKED VIDEOS FROM YOUTUBE

YouTube also has a good recommendation engine when you're play songs from the auto-generated mixtape playlist. So, there are chances of coming across some amazing tunes while you're at it. Rather than creating a separate playlist on YouTube or manually searching for the song on Spotify and then adding it to a playlist, you can use an IFTTT applet. Turning on the 'Add songs from videos you like to a Spotify playlist' (<https://digit.in/YTSpfyIFTT>) applet will create a 'YouTube' playlist in your Spotify account and add every song or video that's
